Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective Not many books merit an eleventh edition but this popular text does Newly updated Introduction to Cataloging and Classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today The text opens with the foundations of cataloging then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records FRBR Functional Requirements for Authority Data FRAD the International Cataloging Principles ICP and RDA Unlike other texts the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats ALA's Anglo American Cataloging Rules 2nd Edition revised AACR2R or the International Standard Bibliographic Description ISBD Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter
