Administrative Rulemaking and Planning in European Laws Giacinto della Cananea, Angela Ferrari Zumbini, 2025-03-15 Administrative rulemaking and planning is an under studied and under theorized area of public law To better understand how administrative functions and powers are discharged by public authorities and private bodies this seventh volume in the Common Core of European Administrative Law series argues that we must consider all forms of administrative action not just formal procedures and judicial review As such greater attention needs to be paid to administrative rulemaking and planning which have a significant impact on economics and society Through extensive comparative research this book examines this increasingly important field of administrative law It focuses mainly on Europe analysing ten national systems including eight European Union member states Norway and the UK but it also explores the legal systems of the United States and China as well as that of a non state entity the European Union itself The questions investigated across these systems include whether administrative agencies may fetter their discretion through policy and rules whether their rules must be published and what remedies are available when plans adversely impact individual rights These questions are examined through a factual analysis based on a set of ten hypothetical cases which are discussed by national experts This comparative approach identifies commonalities and differences between legal systems such as in consultation and transparency in the rights of public service users and in legal remedies to address rules and plans As in other volumes in the series both similarity and difference are essential to understanding how a common core is shaped and evolves

Abuses of Weaponized Interdependence Daniel W. Drezner, Henry Farrell, Abraham L. Newman, 2021-03-02 How globalized information networks can be used for strategic advantage Until recently globalization was viewed on balance as an inherently good thing that would benefit people and societies nearly everywhere Now there is growing concern that some countries will use their position in globalized networks to gain undue influence over other societies through their dominance of information and financial networks a concept known as weaponized interdependence In exploring the conditions under which China Russia and the United States might be expected to weaponize control of information and manipulate the global economy the contributors to this volume challenge scholars and practitioners to think differently about foreign economic policy national security and statecraft for the twenty first century The book addresses such questions as What areas of the global economy are most vulnerable to unilateral control of information and financial networks How sustainable is the use of weaponized interdependence What are the possible responses from targeted actors And how sustainable is the open global economy if weaponized interdependence becomes a default tool for managing international relations Title 22 Foreign Relations Parts 1 to 299 (Revised as of April 1, 2014) Office of The Federal Register, Enhanced by IntraWEB, LLC, 2014-04-01 The Code of Federal Regulations Title 22 contains the codified Federal laws and regulations that are in effect as of the date of the publication pertaining to the United States foreign relations including the Peace Corps Voice of America foreign aid and more **Title 24 Housing and Urban Development Parts 200 to 499 (Revised as of April 1, 2014)** Office of The Federal Register, Enhanced by IntraWEB, LLC, 2014-04-01 The Code of Federal Regulations Title 24 contains the codified Federal laws and regulations that are in effect as of the date of the publication pertaining to Federal housing and urban development programs including equal opportunity and fair housing Federal mortgage and mortgage relief programs neighborhood reinvestment and Section 8 disabled elderly Indian and public housing Getting to Dayton Ivo H. Daalder, 2014-02-01 For over four years Washington responded to war in Bosnia by handing the problem to the Europeans to resolve and substituting high minded rhetoric for concerted action Then in the summer of 1995 the Clinton administration suddenly shifted course deciding to assert the leadership that would prove necessary to end the war in Bosnia This book based on numerous interviews with key participants in the decisionmaking process and written by a former National Security Council aide examines how the policy to end the war took shape Getting to Dayton is a powerful case study of how determined individuals can exploit their positions to change U S government policy on crucial issues In so doing Daalder not only explains how Washington launched the diplomacy that culminated at Dayton but also why the subsequent peace proved to be difficult to establish Ivo H Daalder is a senior fellow at the Brookings Institution From 1995 to 1996 he served on the National Security Council staff as Director for European Affairs where he was responsible for coordinating U S policy for Bosnia His most recent publications include The United States and Europe in the Global Arena 1998 and Bosnia After SFOR Options for Continued U S Engagement 1997 He is co author of Winning Ugly NATO s War to Save Kosovo which will be
