Peri Urban Water And Sanitation Services Policy Planning And Method:

Peri-urban Water and Sanitation Services Mathew Kurian, Patricia McCarney, 2010-12-02 More than 2.6 billion people in the developing world lack access to safe water and sanitation service. The Millennium Development Goals MDG target is to halve the number of people without access to a sustainable source of water supply and connection to a sewer network by 2015. That target is unlikely to be met. If there is anything that can be learnt from European experience it is that institutional reform occurs incrementally when politically enfranchised urban populations perceive a threat to their material well-being due to contamination of water sources.

Peri-Urban Developments and Processes in Africa with Special Reference to Zimbabwe Innocent Chirisa, Elias Mazhindu, Elmond Bandauro, 2016-05-23 This book focuses on peri-urban development processes in Africa with special emphasis on Zimbabwe. The debates included highlight a number of issues in the peri-urban context such as access to water appropriate technologies and land management political economy in the peri-urban space peri-urban agriculture and place marketing in peri-urban development among others. The debates raised by the authors in this book revolve around locating the peri-urban space within the context of sustainability in which key issues are addressed. The book essentially examines peri-urban development processes from various angles in an effort to understand how peri-urban areas develop function and how their residents survive. Peri-urban dwellers currently face numerous challenges including land tenure insecurity poor infrastructure and services land use conflicts stringent planning law and land use planning regulations. This work seeks to address the knowledge gap on peri-urban development processes in Africa and is also intended to inform urban policy practice in the African Cities and beyond. Offering policy makers valuable insights on the peri-urban space it provides guidance for decision making in the contexts of service delivery land management housing new town development and place marketing among others.

Governing the Nexus Mathew Kurian, Reza Ardakanian, 2014-11-08 Global trends such as urbanization demographic and climate change that are currently underway pose serious challenges to sustainable development and integrated resources management. The complex relations between demands resource availability and quality and financial and physical constraints can be addressed by knowledge based policies and reform of professional practice. The nexus approach recognizes the urgent need for this knowledge and its interpretation in a policy relevant setting that is guided by the understanding that there is a lack of blueprints for development based on integrated management of water soil and waste.

Politics and Policies for Water Resources Management in India M. Dinesh Kumar, 2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water management sector of India The authors discuss the nature of the political discourse on water management in India and what characterizes this discourse They also explore how this discourse has influenced the process of framing water related policies in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil society groups on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development

Life-cycle Cost Approach for Management of Environmental Resources V. Ratna Reddy, Mathew Kurian, Reza Ardakanian, 2014-08-22 This book demonstrates the application of Life cycle Cost Approach LCCA in the management of infrastructure and other investment projects in the context of developing countries The main goal is to identify potential opportunities for the adoption LCCA in developing countries with the help of case studies and best practices The editors observe that developing countries are plagued with poor and fluctuating service delivery which affords low or no priority for environmental protection They seek to instill at the policy making level an understanding of why life cycle cost assessment is central to achieving the goals of sustainable development as well as sustainable service delivery and to influence the behavior of sector stakeholders The editors examine the evolution of LCCA from a project appraisal tool to a more comprehensive method of incorporating sustainable development aspects in a variety of sectors By providing a compendium of concepts tools and practical experiences it seeks to broaden the application of LCCA which is often limited to specific phases of the life cycle with little or no weight given to environmental aspects The aim of the book is to mainstream LCCA into governance processes at institutional levels from local to national in order to increase the ability and willingness of decision makers both users and those involved in service planning budgeting and delivery to reach better informed and more relevant choices among different types and levels of products and services

Resources, Services and Risks Mathew Kurian, Reza Ardakanian, Linda Gonçalves Veiga, Kristin Meyer, 2016-01-11 This book discusses the role of observatories in supporting evidence based decision making The book focuses on issues of data accessibility monitoring frameworks and

governance processes with regard to environmental resources water soil and waste This publication highlights challenges related to policy implementation measures and examines current monitoring approaches and illustrates how the UNU FLORES Nexus Observatory seeks to overcome concerns related to data monitoring and governance of water soil and waste resources In particular given that extreme weather events such as droughts and floods are predicted to become more frequent in the future it discusses the need for improved hazard risk monitoring It proposes risk indices for drought and floods which measure exposure and vulnerability to the phenomena through a multitude of bio physical socio economic and institutional indicators Furthermore the potential for using openly accessible data made available through observatories in decision making aimed at improving food security is also discussed It acknowledges governments as key players in environmental resource management and recognizes that decentralization reforms as well as the emergence of information and communication technologies have significantly changed the role of governments in promoting sustainable development The book is particularly relevant for decision makers donor agencies practitioners and students with an interest in environmental management who are also keen followers of discussions on the post 2015 monitoring agenda Coproducing Water, Energy and Waste Services Luisa Moretto,Marco Ranzato,2018-12-07 Conventional services such as water energy and waste services have been for a long time physically networked and centrally managed Today this delivery model appears increasingly inefficient in two respects It often fails in guaranteeing its financial viability and equitable service access and it generally draws heavily on the natural resources conveyed by these services The book aims thus at exploring how service coproduction based on public community collaborations can represent a valuable alternative to the conventional service provision model Contributions in this book look into service coproduction and its relationship with the conventional service model both in the Global North Germany and Global South Bolivia Brazil Colombia India Tanzania They also address a variety of different perspectives in coproducing conventional services such as the role of service modernisation the variety of non networked solutions the relationship with the commons just to cite some of them Eventually this book provides a first comprehensive exploration of the service coproduction theory in relation to conventional services such as water energy and waste The chapters originally published as a special issue in Urban Research Practice The Routledge Handbook on Cities of the Global South Susan Parnell,Sophie Oldfield,2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work

The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Bioregional Planning and Design: Volume I David Fanfani,Alberto Matarán Ruiz,2020-07-20 This book provides a review of the bioregionalist theory in the field of spatial planning and design as a suitable approach to cope with the growing concerns about the negative effects of metropolization processes and the need for a sustainable transition The book starts out with a section on rethinking places for community life and discusses the reframing of regional governance and development as well as social justice in spatial planning It introduces the concept of the urban bioregion a pivotal concept that underpins balanced polycentric spatial patterns and supports self reliant and fair local development The second part of the book focuses on planning and particularly on the issues that arise from the circular recovery of the relation between city and agro ecosystems for integrated planning and resilience of settlements and discusses topics such as foodshed planning biophilic urbanism and the integration of rural development and spatial planning This volume sets out the reference framework for Volume II which deals with more specific and operational issues related to spatial policies and settlement design

Blue Infrastructures Jenia Mukherjee,2020-05-27 This book focuses on Kolkata formerly the colonial capital of and currently a major megacity in India in terms of its extensive blue infrastructures i e its rivers canals and wetlands as an integrated composite whole It unfolds ways in which this reclaimed urban space could determine and in turn could get determined by political fate economic calculations and social livelihoods across changing political economic imperatives and with large scale implications on urban sustainability Employing historical urban political ecology HUPE as the methodological framework by combining urban environmental history and urban political ecology the book studies the changing urban environmental equations through several centuries and its impact on the city and its people Weaving the past present and posterity of deltaic Kolkata the book demonstrates that it is in these blue infrastructures that the anecdote of origin the account of functioning and the apprehension of survival of the city is rooted By emphasizing the ecology of cities instead of ecology in cities approach the book exposes the limitations of contemporary ecological restructuring efforts regarding Indian cities Further it offers a blueprint for future innovative and empirical research focusing on other major cities Accordingly this topical and original book will be of interest to students and researchers of environmental humanities political ecology and urban studies
