

HOUSE TREE PERSON INTERPRETATION

What's being analyzed in your drawing?

- **The dimensions of the drawing** represent your level of self-esteem and confidence.
- **Strokes and lines** (their pressure, firmness, and solidity) indicate the level of determination and how comfortable you feel during a decision-making process. For example, if you tend to draw the same line twice, it shows insecurity, dissatisfaction, and out-of-control perfectionism.
- **Clarity** represents harmony and flexibility.

1. The image of the house

The house represents family relations - how you see and interpret home and family life. It says a lot about how you feel about family values in general and your family in particular.

- **Roof:** represents the intellectual, fantasy, and spiritual life.
- **Chimney:** the affective and sexual life. Smoke coming out of the chimney symbolizes internal tension.
- **Walls:** the firmness and strengths of your personality.
- **Door and windows:** relationship with the surrounding world, social context, level of integration. For example, a very large door shows that you're very dependent.
- **Sidewalks:** openness, access to your intimate family life.
- **Ground:** stability and contact with reality.

2. The image of the tree

The tree symbolizes the deepest and most unconscious aspects of your personality. It represents those things you usually keep to yourself.

- **Crown:** ideas, thoughts, self-concept. For example, crown density is directly connected with mental productivity.
- **Branches:** social contacts, aspirations, and level of satisfaction or frustration.
- **Trunk:** represents your sense of self, the intactness of your personality. If it's curved, it means you're flexible and adapt easily.
- **Roots:** related to your unconscious and instinctive inner world, reality testing, and orientation.
- **Ground:** contact with reality and stability. For example, its absence represents difficulties coping with reality.

Exploring the Child's Personality Coulacoglou Carina, 2008 The objective of this book is to provide readers with a comprehensive account of the child's personality The book examines in detail significant personality dimensions from developmental clinical and cross cultural perspectives The intricacies of personality are exposed by means of the Fairy Tale Test an instrument that attempts to track the preconscious and unconscious processes that OC conspire beneath the behavioral and overt manifestations of personality Children's responses to the FTT questions are assessed both from a quantitative and a qualitative perspective Twenty nine personality variables are used to rate the broad range of personality characteristics No other personality test assesses such a large number of personality parameters The qualitative evaluation of responses includes the analysis of 14 defense mechanisms the study of the nature of anxiety family dynamics and the examination of ego integration and ego strength The unique quality of this book is the use of the FTT in the exploration of the

child OCOs personality using large samples of children derived from diverse cultures. Additional advantages of this book are the chapters which focus on the research into two significant personality traits: aggression and ambivalence, and the chapter on the analysis of idiosyncratic responses; the latter offers valuable information in the classification of original responses into levels of psychopathology. While the FTT has taken significant steps towards becoming a valid and reliable instrument, studies of its psychometric properties are an ongoing process.
