A Career to Make Life Worth Living

Many teenagers spend a lot of time contemplating what they want to do when they graduate from high school. I am fortunate in that I already know; I decided to become a veterinarian when I was two or three years old. Just like humans, animals need people to treat them with the respect and dignity they deserve, and I want to be one of those people. Because of this, I am doing all I can at Reavis to lay the groundwork for my success in college. Then, once I am in college, I will study and learn about all species of animals. Finally, I will find happiness in my career as a veterinarian because when animals need my assistance, I know that I will be able to help them.

First, as a freshman at Reavis High School, I keep in mind my lifelong dream of becoming a veterinarian. I have been taking my education here very seriously, because I know that a person needs to be not only knowledgeable, but also extremely disciplined in order to become a veterinarian. Because of this, I work hard to earn good grades, I take pride in my work, and I have learned to manage my time properly. These skills will be particularly valuable when I enter college.

The Personal Web Mark Chignell, James R. Cordy, Ryan Kealey, Joanna Ng, Yelena Yesha, 2013-07-15 This book grew out of the First Symposium on the Personal Web co located with CASCON 2010 in Markham Ontario Canada The purpose of the symposium was to bring together prominent researchers and practitioners from a diverse range of research areas relevant to the advancement of science and practice relating to the Personal Web Research on the Personal Web is an outgrowth of the Smart Internet initiative which seeks to extend and transform the web to be centred on the user with the web as a calm platform ubiquitously providing cognitive support to its user and his or her tasks As with the preceding SITCON workshop held at CASCON 2009 this symposium involved a multi disciplinary effort that brought together researchers and practitioners in data integration web services modelling and architecture human computer interaction predictive analytics cloud infrastructure semantics and ontology and industrial application domains such as health care and finance The discussions during the symposium dealt with different aspects of the architecture and functionality needed to make the Personal Web a reality After the symposium the authors reworked their presentations into draft chapters that were submitted for peer evaluation and review Every chapter went through two rounds of reviewing by at least two independent expert reviewers and accepted chapters were then revised and are presented in this book

Personal Insolvency and Data Collection Systems Mr. José M. Garrido, Jason Kilborn, Anjum Rosha, 2025-06-20 Countries around the world are introducing or improving their personal insolvency regimes but frequently the effects of these reforms are not evaluated and the reforms themselves are not supported by adequate data analysis This paper proposes the establishment and implementation of data collection systems for personal insolvency and examines the characteristics of such systems to assess the performance of personal insolvency regimes and to extract information useful not only for the design of personal insolvency but also for other social policies Adequate data collection can contribute to effectively achieving the goals of personal insolvency reform

Progress of the Personal Income Tax in Emerging and Developing Countries Ms. Dora Benedek, Juan Carlos Benitez, Charles Vellutini, 2022-01-28 Personal Income Tax PIT is one of the key sources of revenues in Advanced Economies AEs but plays a much more limited role in Low Income Developing Countries LIDCs and Emerging Market Economies EMEs both in terms of revenue and redistributive impact Notwithstanding this paper shows that LIDCs and EMEs increased their PIT to GDP revenue by 110 and 48 percent respectively during the 1990 2019 period a marked improvement in the PIT revenue performance We find that this rise was driven primarily by economic developments and to a lesser extent by changes in the design of PIT systems We also find that LIDCs that improved their tax to GDP ratios relied on a broader set of tax instruments and not exclusively on the PIT suggesting that a successful revenue mobilization strategy of developing countries requires a comprehensive approach covering a wider range of taxes Finally using a newly assembled dataset of PIT characteristics of 157 countries over the 2006 2018 period we estimate a novel redistribution index of the PIT in LIDCs We show that the contribution of the PIT to inequality reductions has been significant
