Time for a Model Change Graeme P. Maxton, John Wormald, 2004-11-04 The automotive industry ranks among the most significant business phenomena of the 20th century and remains vitally important today accounting for almost 11% of the GDP of North America Europe and Japan and one in nine jobs In economic and social terms alike its products have had a fundamental impact on modern society for better and worse Yet the industry has found it hard to adjust to recent challenges and is no longer much valued by the capital markets It is riven with internal contradictions that inhibit reform and faces a stark choice between years of strife or radical change This book is a wake up call for those who work in the automotive business It highlights the challenges and opportunities that exist for managers legislators financial institutions and potential industry entrants Most of all it gives us all cause to reflect on the value of our mobility today and tomorrow

*Specialty Retailers -- Marketing Triumphs and Blunders* Ronald D. Michman, Edward M. Mazze, 2001-02-28 Michman and Mazze present five key variables that retailing executives in nine specialty businesses must understand and work with to gain and sustain competitive advantage in their competitive environments Innovation target market segmentation image development physical store decor and human resource managementf are identified and examined Authors argue convincingly from research and practical experience that these fundamental considerations are crucial to achieving competitive dominance With up to date analyses and extensive coverage of e commerce and internet retailing as well their book is essential for retailing executives Michman and Mazze find that successful specialty retailers are not all things to all customers and do not try to be They are however the first to apply new technologies Authors analyze the development of specialty stores in the U S and tie their variables together in an epilogue Along the way they make clear that by focusing on their five critical variables we can understand how marketing successes come about and what causes blunders

in the nine highly important store categories under their examination here They point out that not all of their variables need be used concurrently Some may be more critical than others and this depends on environmental and competitive conditions Backing it all up is meticulously developed evidence from their research and personal experience all of it presented readably and in a way that practitioners can understand and immediately apply Federal Trade Commission Decisions United States.
