Active Learning in College Science Joel J. Mintzes,Emily M. Walter,2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for From Food Scarcity to Surplus Ashok Gulati,Yuan Zhou,Jikun Huang,Alon Tal,Ritika Juneja,2021-02-07 This book brings together unique experiences of India China and Israel in overcoming economic social and natural resource challenges Through its eleven chapters the book captures the role of groundbreaking innovations in achieving unprecedented agricultural growth and stabilizing these nations It provides a future

outlook of the new challenges that will confront these countries in 2030 and beyond related to tackling food and nutrition security sustainable agricultural growth and adhering to improved food safety standards This book provides useful insights for exploring technological innovations and policies that can address these future challenges and develop profitable and sustainable agriculture This volume also highlights valuable lessons that India China and Israel provide for the rest of the developing world where population is growing fast natural resources are limited and it is a challenge to produce enough food feed and fibre for their populations Tracing the historical past this book is an impressive resource for academicians policymakers practitioners agribusiness players entrepreneurs in understanding the role of innovations in addressing future challenges September 2019 Monthly Current Affairs with MCQs for Competitive Exams Disha Experts,2019-09-01

Sciences Research Zvonimir Koporc, 2018-12-06 This important volume covers ethics and integrity in health and life sciences research It addresses concerns in gene editing dual use and misuse of biotechnologies big data and nutritional science in health and medicine and covers attempts at ensuring ethical practices in such fields are shared internationally

Participation in Computing William Aspray, 2016-03-01 This book provides a history of the efforts of the US National Science Foundation to broaden participation in computing The book briefly discusses the early history of the NSF's involvement with education and workforce issues It then turns to two programs outside the computing directorate the ADVANCE program and the Program on Women and Girls that set the stage for three programs in the NSF computing directorate on broadening participation the IT Workforce Program the Broadening Participation in Computing program and the Computing Education for the 21st Century program The work looks at NSF funded research and NSF funded interventions both to increase the number of women underrepresented minorities African Americans Hispanics and American Indians and people with disabilities and to increase the number of public schools offering rigorous instruction in computing Other organizations such as the ACM the Computer Science Teachers Association and Code.org are also covered The years covered are primarily 1980 to the present

Fostering Integrity in Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Science, Engineering, Medicine, and Public Policy, Committee on Responsible Science, 2018-01-13 The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity honesty openness fairness accountability and stewardship Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step of the research process Understanding the dynamics that support or distort practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge The 1992 report Responsible Science Ensuring the Integrity of the Research Process evaluated issues related to scientific responsibility and the conduct of research It provided a valuable service in describing and analyzing a very complicated set of issues and has served as a crucial basis for thinking about research integrity for more than two decades However as experience has accumulated with various forms of research misconduct detrimental research practices and other forms of misconduct as subsequent empirical research has revealed more about the nature of scientific misconduct and because technological and social changes have altered the environment in which science is conducted it is clear that the framework established more than two decades ago needs to be updated Responsible Science served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process Fostering Integrity in Research identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and detrimental research practices

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings

that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual use life science arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives.

Advances in Food Biotechnology Ravishankar Rai V, 2015-12-21. ADVANCES IN FOOD BIOTECHNOLOGY. The application of biotechnology in the food sciences has led to an increase in food production and enhanced the quality and safety of food. Food biotechnology is a dynamic field and the continual progress and advances have not only dealt effectively with issues related to food security but also augmented the nutritional and health aspects of food. *Advances in Food Biotechnology* provides an overview of the latest development in food biotechnology as it relates to safety, quality, and security. The seven sections of the book are multidisciplinary and cover the following topics: GMOs and food security issues; Applications of enzymes in food processing; Fermentation technology; Functional food and nutraceuticals; Valorization of food waste; Detection and control of foodborne pathogens; Emerging techniques in food processing. Bringing together experts drawn from around the world, the book is a comprehensive reference in the most progressive field of food science and will be of interest to professionals, scientists, and academics in the food and biotech industries. The book will be highly resourceful to governmental research regulatory agencies and those who are studying and teaching food biotechnology. Also available from Wiley. The Science of Effective Mentorship in STEMM. National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Effective Mentoring in STEMM, 2020-01-24. Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. *The Science of Effective Mentorship in STEMM* studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of

underrepresented students in STEMM mentorship structures and behaviors and institutional cultures that support mentorship This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions departments and individual faculty members
