Muller, D.

Lamparsky, 2012-12-06 The idea of publishing this book on Perfumes Art Science and Technology grew out of the observation that on the verge of the 1990s there was really no state of the art compilation of the relevant know how on which the fragrance industry is based It was obvious that such a compilation would be well received not only by perfumers and fragrance chemists but also by those involved in related trade and marketing or in the development and distribution of consumer products by researchers from other fields by students and finally by amateurs of perfumes in general Therefore we set out to find competent authors who were willing to contribute to the endeavour and we did not do this unselfishly on the contrary we selected a wish list of specialists who would provide us with new insight and characterize the trends and research priorities determining the future Thus we were counting on learning much ourselves in the course of the project We were more than pleasantly surprised by the reactions to our first letter and so was Elsevier We certainly had not expected perfumers who are usually much more doers than writers to react in such an enthusiastic way especially the spontaneous affirmative answer from the famous E Roudnitska created a momentum which contributed significantly to the successful completion of this book But of course we should not create the impression that the other authors chapters are less important and we thank all of them heartily for their invaluable effort *Fragrant Introduction to Terpenoid Chemistry* Charles S Sell, 2019-05-16 Terpenoids play an important part in all our lives from Vitamin A and hormones to perfumes and pharmaceuticals This book provides an introduction to terpenoid chemistry concentrating on the lower terpenoids but the basic principles taught are also the foundation for the chemistry of the higher terpenoids Coverage includes the biogenesis of

terpenoids some of the history of the field the principles of structural determination and the importance of stereochemistry and stereoselective synthesis Carbocation chemistry is introduced as are the principles of total and partial synthesis Finally industrial chemistry both discovery chemistry and chemical process development is discussed using the volatile terpenoids of perfumery to illustrate basic concepts Ideal as both an introduction to terpenoid chemistry and as a refresher course A Fragrant Introduction to Terpenoid Chemistry with its real life problems and appreciation of the relevance of chemistry to everyday life will prove invaluable to students lecturers and industrialists alike

Perfume in the Bible Charles S Sell, 2019-07-26 Perfume is part of the biblical text from Genesis through to Revelation just as perfume pervades our modern life Identifying the ingredients used in biblical times is difficult when information and meaning is lost in ancient languages As expected biblical perfumes were made from natural products but the range employed is surprisingly different from those of modern perfumes The biblical ingredients are either defensive substances or products of decay opening up an avenue of speculation as to why this is so Charles Sell started his research into this area whilst working at Givaudan the world's leading manufacturer of perfumes and flavours The introductory chapter of this book gives a brief outline of the history of the Bible lands paving the way to understanding the difficulties in identifying exactly which plant sources the original authors meant Other chapters discuss how plants make chemicals and how the sense of smell functions The book explores the preparation storage and uses of perfume both sacred and secular and compares and contrasts biblical perfumes with their modern equivalents It recounts some interesting biblical events involving perfume ranging from courtship through seduction to prostitution and murder The use of beautiful images from the windows of Canterbury Cathedral where the author is a guide illustrate some of the people and events in the biblical accounts and enable visualization of the historical uses of perfumes The book is aimed at a broad audience and requires no prior specialised knowledge The subject matter will be of interest to everyone including chemists and general scientists historians those interested in perfumery those interested in religious studies and anyone interested in exploring chemistry in the world of art and the creative professions
