Felix F. Flemisch, 2024-02-26 This research paper continues 15 We begin with giving a profound overview of the structure of arbitrary simple groups and in particular of the simple locally finite groups and reduce their Sylow theory for the prime p to a quite famous conjecture by Prof Otto H Kegel see 37 Theorem 2.4 Let the p subgroup P be a p uniqueness subgroup in the finite simple group S which belongs to one of the seven rank unbounded families Then the rank of S is bounded in terms of P about the rank unbounded ones of the 19 known families of finite simple groups We introduce a new scheme to describe the 19 families the family T of types define the rank of each type and emphasise the role of Kegel covers This part presents a unified picture of known results whose proofs are by reference Subsequently we apply new ideas to prove the conjecture for the alternating groups Thereupon we are remembering Kegel covers and sequences Next we suggest a way 1 and a way 2 how to prove and even how to optimise Kegel's conjecture step by step or peu peu which leads to Conjecture 1 Conjecture 2 and Conjecture 3 thereby unifying Sylow theory in locally finite simple groups with Sylow theory in locally finite and p soluble groups whose joint study directs Sylow theory in locally finite groups For any unexplained terminology we refer to 15 We then continue the program begun above to optimise along the way 1 the theorem about the first type An of infinite families of finite simple groups step by step to further types by proving it for the second type A_{PSLn} We start with proving Conjecture 2 about the General Linear Groups over commutative locally finite fields stating that their rank is bounded in terms of their p uniqueness

and then break down this insight to the Special Linear Groups and the Projective Special Linear PSL Groups over locally finite fields We close with suggestions for future research regarding the remaining rank unbounded types the Classical Groups and the way 2 regarding locally finite and p soluble groups and regarding Cauchy s and Galois contributions to Sylow theory in finite groups We much hope to enthuse group theorists with them We include the predecessor research paper 15 as an Appendix

Coding, Shaping, Making Haresh Lalvani,2023-01-31 Coding Shaping Making combines inspiration from architecture mathematics biology chemistry physics and computation to look towards the future of architecture design and art It presents ongoing experiments in the search for fundamental principles of form and form making in nature so that we can better inform our own built environment In the coming decades matter will become encoded with shape information so that it shapes itself as happens in biology Physical objects shaped by forces as well will begin to design themselves based on information encoded in matter they are made of This knowledge will be scaled and trickled up to architecture Consequently architecture will begin to design itself and the role of the architect will need redefining This heavily illustrated book highlights Haresh Lalvani s efforts towards this speculative future through experiments in form and form making including his work in developing a new approach to shape coding exploring higher dimensional geometry for designing physical structures and organizing form in higher dimensional

diagrams Taking an in depth look at Lalvani s pioneering experiments of mass customization in industrial products in architecture combined with his idea of a form continuum this book argues for the need for integration of coding shaping and making in future technologies into one seamless process Drawing together decades of research this book will be a thought provoking read for architecture professionals and students especially those interested in the future of the discipline as it relates to mathematics science technology and art It will also interest those in the latter fields for its broader implications

Montana Vigilantes, 1863-1870 Mark C. Dillon, 2018-10-22 A history and legal analysis of vigilantism in Montana in the 1860s from a state Supreme Court justice and legal historian Historians and novelists alike have described the vigilantism that took root in the gold mining communities of Montana in the mid 1860s but Mark C Dillon is the first to examine the subject through the prism of American legal history considering the state of criminal justice and law enforcement in the western territories and also trial procedures gubernatorial politics legislative enactments and constitutional rights Using newspaper articles diaries letters biographies invoices and books that speak to the compelling history of Montana s vigilantism in the 1860s Dillon examines the conduct of the vigilantes in the context of the due process norms of the time He implicates the influence of lawyers and judges who like their non lawyer counterparts shaped history during the rush to earn fortunes in gold Dillon s perspective as a state Supreme Court justice and legal historian uniquely illuminates the intersection of territorial politics constitutional issues corrupt law enforcement and the basic need of citizenry for social order This readable and well directed analysis of the social and legal context that contributed to the rise of Montana vigilante groups will be of interest to scholars and general readers interested in Western history law and criminal justice for years to come Justice Dillon s book reads like a Western Dillon masterfully sets the stage for the rise of the Montana vigilantes by bringing alive the people who created and lived in mining towns There are heroes villains shady characters and more than a few politicians businessmen lawyers and judges What sets Dillon s book apart from historical texts and fictional tales is that he provides legal analyses and explanations of the trials sentences due process and procedures of the day And shed s grisly light on the details of the hangings Dillon s unique background as an attorney and judge and his downright dogged research are what makes this complex story so engaging The prose is clear crisp and gets to the point The book is satisfying because it answers contemporary nagging questions about the law regarding the vigilantes and the hangings Gregory Zenon Brooklyn Barrister Dillon s analysis of the vigilantes of Bannack Alder Gulch and Helena in Montana Territory is the most detailed insightful and legally nuanced yet produced This book is a model for historians to follow when dealing with 19th century criminal proceedings Establishing historical context includes examining the laws in books as well as the law in action Gordon Morris Bakken Great Plains Research *Chemical Evolution* Bernd Markert, Stefan Fränzle, Simone Wünschmann, 2015-02-19 This book is written for researchers and students interested in the function and role of chemical elements in biological or environmental systems Experts have long known that the Periodic

System of Elements PSE provides only an inadequate chemical description of elements of biological environmental or medicinal importance This book explores the notion of a Biological System of the Elements BSE established on accurate and precise multi element data including evolutionary aspects representative sampling procedures inter element relationships the physiological function of elements and uptake mechanisms The book further explores the concept Stoichiometric Network Analysis SNA to analyze the biological roles of chemical species Also discussed is the idea of ecotoxicological identity cards which give a first hand description of properties relevant for biological and toxicological features of a certain chemical element and its geo biochemically plausible speciation form The focus of this book goes beyond both classical bioinorganic chemistry and toxicology
