**Urban Agriculture and Community Values**

Lisa Newton,2020-03-18 This book addresses the evolving crisis in agriculture and sketches the community economy that grounds agricultural enterprise more accurately than the industrial model In its current practice agriculture is in the United States but increasingly in the rest of the world unsustainable and destructive The most immediately unsustainable feature of industrial agriculture is its dependence on the products of petroleum as feedstock for fertilizers herbicides and pesticides and as fuel for the farm machinery and transport of agricultural products into the cities The problems of agriculture and in general the food systems to which it is attached range from the vulnerability of monocultures to new and stronger pests to the emerging medical problem of obesity The need for agricultural reform is widely acknowledged one part of the new work being done suggests that food production in the cities may solve several of its problems at once This book is suitable for both undergraduate and graduate students in agriculture and environmental studies

**Miraculous Abundance** Perrine

Herve-Gruyer,Charles Herve-Gruyer,2016-03-14 Farmers like Charles and Perrine Herv Gruyer are beacons of light Their work allows the rest of the world to see that there is another life there is another way Eliot Coleman What began as a simple dream has turned into one of the world s most radical innovative experiments in small scale farming using the Bec Hellouin model for growing food sequestering carbon creating jobs and increasing biodiversity without using fossil fuels When Charles and Perrine Herv Gruyer set out to create their farm in a historic Normandy village they had no idea just how much their lives would change Neither one had ever farmed before Charles had been traveling the globe teaching students about ecology and indigenous cultures Perrine had been an international lawyer in Japan Their farm Bec Hellouin has since become an internationally celebrated model of innovation in ecological agriculture Miraculous Abundance is the eloquent tale of the couple s quest to build an agricultural model that can carry us into a post carbon future The authors dive deeper into the various farming methods across the globe that contributed towards the creation of the Bec Hellouin model including

Permaculture and soil health principles Korean natural farming methods Managing a four season farm Creating a productive agroecosystem that is resilient and durable Using no dig methods for soil fertility Modelling an agrarian system that supports its community in totality from craft restaurants and shared work spaces to jobs agritourism energy and ecological biodiversity Perfect for aspiring and experienced farmers gardeners and homesteaders Miraculous Abundance is a love letter to a future where ecological farming is at the centre of every community This book more about philosophy than a how to describes how two inexperienced beginners succeeded in creating a gorgeous productive self sustaining farm Marion Nestle

crisis we face allowing you to participate in the Earth's return to health right from your own backyard      Toward Self-Sufficiency George Hunt, 2018-11-16 George Hunt spent more than fifty years as a community planner and landscape architect. This included hands-on work in impoverished and low-income areas which helped him understand the dynamics that hold us back from achieving self-sufficiency. In this book, he outlines a sustainable community project that seeks to solve social problems that most community planners overlook. The pilot project includes numerous ways to make communities self-sufficient and while it's geared for those in middle and lower income brackets, anyone can use its concepts. He explains how multiple purpose buildings can be used to house a diversity of people, ways to launch a business within the community by collaborating and sharing with others, how to obtain a vocational work study program offered on-site, and more. The book is also a reference manual on transition community design, creating a purpose, the meaning of happiness, sustainable agricultural practices, how to live without stuff, and how to reduce anxiety and depression.

**Mass Intellectuality and Democratic Leadership in Higher Education** Joss Winn, Richard Hall, 2017-08-24 Higher education in the UK is in crisis. The idea of the public university is under assault and both the future of the sector and its relationship to society are being gambled. Higher education is increasingly unaffordable; its historic institutions are becoming untenable and their purpose is resolutely instrumental. What and who have led us to this crisis? What are the alternatives? To whom do we look for leadership in revealing those alternatives? This book critically analyses intellectual leadership in the university, exploring ongoing efforts from around the world to create alternative models for organizing higher education and the production of knowledge. Its authors offer their experience and views from inside and beyond the structures of mainstream higher education in order to reflect on efforts to create alternatives. In the process, the volume asks: is it possible to reimagine the university democratically and cooperatively? If so, what are the implications for leadership not just within the university but also in terms of higher education's relationship to society? The authors argue that mass higher education is at the point where it no longer reflects the needs, capacities, and long-term interests of global society. An alternative role and purpose is required based upon mass intellectuality or the real possibility of democracy in learning and the production of knowledge.

*Research Handbook on Biodiversity and Law* Michael Bowman, Peter Davies, Edward Goodwin, 2016-04-29 The crucial importance of biodiversity law to future human welfare is only now being fully appreciated. This wide-ranging Handbook presents a range of perspectives from leading international experts reflecting up-to-date research thinking on the vital subject of biodiversity and its interaction with law. Through a rigorous examination of the principles, procedures, and practices that characterise this area of law, this timely volume effectively highlights its objectives, implementation, achievements, and prospects. More specifically, the work addresses the regulatory challenges posed by the principal contemporary threats to biological diversity, the applicable general principles of international environmental law, and the visions, values, and voices that are shaping the development of the law. Presenting thematic rather than regime-based coverage, the editors demonstrate the state of the art

of current research and identify future research needs and directions This comprehensive and authoritative Handbook will be an indispensable resource for legal scholars students and practitioners alike **High-impact, Low-carbon Gardening**
