Wendling, 2006-05-11 Preparing the Next Generation of Oral Historians is an invaluable resource to educators seeking to bring history alive for students at all levels. The anthology opens with chapters on the fundamentals of oral history and its place in the classroom, but its heart lies in nearly two dozen insightful personal essays by educators who have successfully incorporated oral history into their own teaching. Filled with step-by-step descriptions and positive student feedback, these chapters offer practical suggestions on creating curricula, engaging students, gathering community support, and meeting educational standards. Lanman and Wendling open each chapter with thoughtful questions that guide readers, whether unfamiliar with oral history or seeking to refine their approach in applying the examples to their own classrooms. The bibliography of further resources at the end of the anthology's close provides interested educators with all the information necessary to transform their lessons and show their students history's power as a living force within their own lives and communities. The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers

genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *The Oxford Companion to Fairy Tales* Jack Zipes,2015 This Oxford companion provides an authoritative reference source for fairy tales exploring the tales themselves both ancient and modern the writers who wrote and reworked them and related topics such as film art opera and even advertising **PIRATE TALES: 80+ Novels, Stories, Legends & History of the True Buccaneers** Jules Verne,Charles Dickens,Robert Louis Stevenson,James Fenimore Cooper,Edgar Allan Poe,William Hope Hodgson,Jeffery Farnol,Howard Pyle,Jack London,Arthur Conan Doyle,Richard Le Gallienne,Walter Scott,Frederick Ferdinand Moore,Daniel Defoe,Alexandre Dumas,Charles Ellms,Frederick Marryat,John Masefield,Rafael Sabatini,Harold MacGrath,Joseph Lewis French,Clarence Henry Haring,Harry Collingwood,Stanley Lane-Poole,Charles Boardman Hawes,L.
