Elkins,2018-08-06 In the domain of visual images those of fine art form a tiny minority This original and brilliant book calls upon art historians to look beyond their traditional subjects painting drawing photography and printmaking to the vast array of nonart images including those from science technology commerce medicine music and archaeology Such images James Elkins asserts can be as rich and expressive as any canonical painting Using scores of illustrations as examples he proposes a radically new way of thinking about visual analysis one that relies on an object's own internal sense of organization Elkins

begins by demonstrating the arbitrariness of current criteria used by art historians for selecting images for study He urges scholars to adopt instead the far broader criteria of the young field of image studies After analyzing the philosophic underpinnings of this interdisciplinary field he surveys the entire range of images from calligraphy to mathematical graphs and abstract painting Throughout Elkins blends philosophic analysis with historical detail to produce a startling new sense of such basic terms as pictures writing and notation Deep-Sky Companions: The Messier Objects Stephen James O'Meara,2014 The bright galaxies star clusters and nebulae catalogued in the late 1700s by the famous comet hunter Charles Messier are still the most widely observed celestial wonders in the sky The second edition of Stephen James O Meara s acclaimed observing guide to the Messier Objects features improved star charts for helping you find the objects a much more robust telling of the history behind their discovery including a glimpse into Messier s fascinating life and updated astrophysical facts to put it all into context These additions along with new photos taken with the most advanced amateur telescopes bring O Meara s first edition more than a decade into the twenty first century Expand your universe and test your viewing skills with this truly modern Messier guide It is a must for all budding night watchers **Multisensory Teaching of Basic Language Skills** Judith R.
