aware choices knowledge of the world in which one makes those choices the importance of play and humor in crafting a compassionate worldview and acts of continuous self examination and creation This collection of essays uses inventiveness and creation as a thematic core to combine normally disparate themes such as science fiction studies the effect of collaborative writing and shared authorship steampunk aesthetics productive modes of ownership intertextuality neomedievalism and colonialism adaptations into other media linguistics and rhetorics and coming of age as an act of free will

The Hive Construct Alexander Maskill, 2014-09-25 Situated deep in the Sahara Desert New Cairo is a city built on technology from the huge life giving solar panels that keep it functioning in a radically changed resource scarce world to the artificial implants that have become the answer to all and any of mankind's medical problems But it is also a divided city dominated by a handful of omnipotent corporate dynasties And when a devastating new computer virus begins to spread through the poorest districts shutting down the life giving implants that enable so many to survive the city begins to slide into the anarchy of violent class struggle Hiding amidst the chaos is Zala Ulora A gifted hacker and fugitive from justice she believes she might be able to earn her life back by tracing the virus to its source and destroying it before it destroys the city Or before the city destroys itself With its vivid characters bold ideas and explosive action The Hive is science fiction at its most exciting inventive and accessible

Environments in Science Fiction Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question How do spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two
