

## **Evaluation: The International Journal of Theory, Research and Practice**

Daniela C. Schröter

In a time of results-based management and budgeting, the question whether or not the *inputs* have been in line with the policies of donors and partner countries is not longer really relevant. The real question is whether the *results* of our actions are in line with the policies and the problems that these policies tried to address.

(van den Berg, p. 35)

The first 2005 issue of *Evaluation* (Volume 11(1), January 2005) begins with two contributions to *A Visit to the World of Practice*, both of which focus on results-based evaluation and impact assessment within the context of the Millennium Development Goals (MDGs). Please visit <http://ddp-ext.worldbank.org/ext/MDG/-home.do> for information on the MDGs.

First, Kusek, Rist, and White discuss how the shift from implementation-focused monitoring and evaluation (M&E) to results-based M&E is taking place in various developed and developing countries, which challenges are being faced in this transition, and what strategies should be considered when introducing results-based M&E, including readiness assessments, political and organizational issues, and potential challenges with implementation, reliable data collection and analysis.
