Inquiry as Inquiry: A Logic of Scientific Discovery Jaakko Hintikka, 2013-04-17 Is a genuine logic of scientific discovery possible In the essays collected here Hintikka not only defends an affirmative answer he also outlines such a logic It is the logic of questions and answers Thus inquiry in the sense of knowledge seeking becomes inquiry in the sense of interrogation Using this new logic Hintikka establishes a result that will undoubtedly be considered the fundamental theorem of all epistemology viz the virtual identity of optimal strategies of pure discovery with optimal deductive strategies Questions to Nature of course must include observations and experiments Hintikka shows in fact how the logic of experimental inquiry can be understood from the interrogative vantage point Other important topics examined include induction in a forgotten sense that has nevertheless played a role in science explanation the incommensurability of theories theory ladenness of observations and identifiability [The Logic of Scientific Discovery](#) Lee C. Sample Book Insights

- 1 The task of the logic of scientific discovery is to analyze the method of the empirical sciences The methods of the empirical sciences are the steps that a scientist takes to test his hypotheses
- 2 The problem of induction is the question of the validity of universal statements based on experience such as the hypotheses and theoretical systems of the empirical sciences People believe that the truth of these universal statements is known by experience but it is clear that an account of an experience can only be a singular statement and not a universal one
- 3 The principle of induction is a universal statement that is accepted by the whole of science However this does not mean that it is known from experience The attempt to base the principle of induction on experience leads to an infinite regress
- 4 The work of the scientist is to put forward and test theories The initial stage the act of conceiving or inventing a theory seems to me to be neither susceptible of nor calling for logical analysis
