[The Desecularisation of the City](#) David Goodhew, Anthony-Paul Cooper, 2018-09-21 Major cities have long been seen as centres of secularisation However the number of congregations in London grew by 50% between 1979 and the present London s churches have been characterised more by growth than by decline in the decades since 1980 The Desecularisation of the City provides the first academic survey of churches in London over recent decades linking them to similar developments in other major cities across the West Produced by a large team of scholars from a range of disciplines this volume offers a striking and original portrait of congregational life in London since 1980 Seventeen chapters explore the diverse localities ethnicities and denominations that make up the church in contemporary London The vitality of London s churches in the last four decades shows that secularisation is far from inevitable in the cities of the future This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West which has mostly depicted cities as secular spaces within a secularising culture It will be of great interest to scholars working across a wide range of disciplines including history

post industrial decline to thriving metropolises that are as prosperous and liveable as anywhere on Earth      The UK Regional-National Economic Problem Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government      Global Political Cities Kent E. Calder,2021-01-26 Why cities often cope better than nations with today s lightning fast changes The British Empire declined decades ago but London remains one of the world s preeminent centers of finance commerce and political discourse London is just one of the global cities assuming greater importance in the post cold war world even as many national governments struggle to meet the needs of their citizens Global Political Cities shows how and why cities are re asserting their historic role at the forefront of international economic and political life The book focuses on fifteen major cities across Europe Asia and the United States including New York London Tokyo Brussels Seoul Geneva and Hong Kong not to mention Beijing and Washington D C In addition to highlighting the achievements of high profile mayors the book chronicles the growing influence of think tanks mass media and other global agenda setters in their local urban political settings It also shows how these cities serve in the Internet age as the global stage for grassroots appeals and protests of international significance Global Political Cities shows why cities cope much better than nations with many global problems and how their strengths can help transform both nations and the broader world in future The book offers important insights for students of both international and comparative political economy diplomats and other government officials executives of businesses with global reach and general readers interested in how the world is changing around them      **London: Mobility City** Greg Clark,Tim Moonen,Jake Nunley,2018-11-16 Despite the uncertainties of Brexit London continues to be rated as a leading location in Europe and the world for business knowledge and talent But 30 years

ago when London had no citywide government a transport system in crisis and no successful track record of continuous large scale upgrades to the urban fabric this scenario would have seemed highly unlikely In this essay we examine how London s unpromising 1980s gave rise to three decades of reinvestment and we explain how the European Investment Bank played an essential catalytic role in successive cycles of London s evolution from an under governed de populating national capital into a diverse global centre benefiting from integrated urban systems management World Cities and Nation States Greg Clark,Tim Moonen,2016-11-10 World Cities and Nation States takes a global perspective to show how national governments and states provinces regions continue to play a decisive and often positive partnership role with world cities The 16 chapter book comprised of two introductory chapters 12 central chapters that draw on case studies and two summary chapters draws on over 40 interviews with national ministers city government officials business leaders and expert academics
