Nielsen Answers User Guide:

Your Library Is the Answer Christina T. Russo, Cathy Swan, 2015-01-22 Today's tech savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st century tools and know-how necessary for educators to appeal to and challenge students to learn and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication attributes of their lives outside of education via the integration of cutting edge technologies and new media in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning such as flipping the classroom or library. Readers of this book will find concrete step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors, both award-winning teachers, explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.

English-Latvian Lexicographic Tradition Laura Karpinska, 2015-10-16 Since 1987 when the first English explanatory dictionary fully based on corpus evidence was published, considerable changes related to the choice of lexicographic evidence have affected the field of lexicography. On this background, even though the volume of the lexicographic material is ample, the English-Latvian lexicographic tradition looks rather traditional and even somewhat stagnant. Thus, there is an urgent need for a detailed analytical inventory of English-Latvian dictionaries in order to facilitate new dictionary projects. This book provides a comprehensive survey of the development of the English-Latvian lexicographic tradition, considering the various extra-linguistic factors which have influenced it. It studies the typical features of English-Latvian dictionaries traced throughout the tradition at the levels of their mega-macro and microstructure, pinpoints the problematic aspects of English-Latvian lexicography, and offers theoretically grounded solutions for improving the quality of future English-Latvian dictionaries.
