**Fy2023-24 Q2** Balachandran Viswaram,2023-09-28 The chapters below are the analysis of each day s price movement It is highly technical in nature and my reports are based on the charts Usually I start with the 5mts candle and call out any anomaly or unusual patterns Then I take up the 1hr chart to see if it fits into the broader trend The trading style I follow scans for the market direction and play along For example if the markets are falling I still prefer to short CALLS Agreed the premiums in CEs would have dropped once the index makes its move but I feel it is in sync with my risk profile Also I prefer to wait for the volatility to pick up before selling options On each expiry day I bring up the weekly analysis to comment on how that index behaved in the last week And on the last expiry of the month I bring up the monthly chart Nifty is discussed first followed by Banknifty On Tuesdays I bring up the FinNifty charts Since we have one or the other index expiring daily most of the trades are done to take advantage of that I guess the market participants are growing in huge numbers to play expiry a situation similar to gambling is happening Strongly advise to do your own research and deploy strategies that are inline with your risk management      **Technical Analysis Trading Methods and Techniques (Collection)** Richard A.
