Politicians at Night Gonen Dori-Hacohen, Eean Grimshaw, Menno H. Reijven, 2024-02-19 *Politicians at Night* Interaction and Discourse on the Entertainment Political Interview studies the exchanges between presidential candidates and talk show hosts on broadcast late night shows in the United States. Gonen Dori-Hacohen, Eean Grimshaw, and Menno H. Reijven use various language and social interaction frameworks including membership categorization analysis, conversation analysis, narrative analysis, and semiotics. They develop a broad understanding of the Entertainment Political Interview (EPI) and cultural role. They discuss how politicians use pronouns to achieve inclusion and exclusion. Similarly, the authors demonstrate how and why the hosts ask softball questions. Unlike these two elements that create politics, the authors demonstrate how politicians use stories to present themselves like celebrities. They then demonstrate how politicians intersect with entertainment when they analyze one specific segment called Slow Jam the News on The Tonight Show with Jimmy Fallon. The linking of the politician to entertainment is part of the final argument of the book where the authors critically examine the EPI as part of a myth since it vacates the politics of its original form while maintaining a facade of politics. EPI promotes a capitalist neoliberal ideology that is at the root of both entertainment and politics in the U.S.

Family Math Night K-5 Jennifer Taylor-Cox, 2017-08-03 Host family math nights at your elementary school starting today. Family math nights are a great way for teachers to get parents involved in their children's education and to promote math learning outside of the classroom. In this practical book, you'll find step-by-step guidelines and activities to help you bring family math nights to life. The enhanced second edition is aligned with the Common Core State Standards for Mathematical Content and Practice with new activities to help students explain their answers and write about math. It also comes with ready-to-use handouts that you can distribute during your event. With the resources in this book, you'll have everything you need to help students learn essential math concepts including counting and cardinality, operations and algebraic thinking, numbers and operations in base ten, number and operations fractions, measurement and data, and geometry in a fun and supportive environment. **Special Features:** The book is organized by math content and grade band so you can quickly find activities that meet your needs. Each activity is easy to implement and includes a page of instructions educators can use to prepare the station as well as a page for families that explains the activity and can be photocopied and displayed at the station. All of the family activities can be photocopied or downloaded from our website www.routledge.com/9781138915541 so that you can distribute them during your event.

Questions and Answers in Embedded Contexts Utpal Lahiri, 2002 Linguists and others have realised for some time that predicates of the know and wonder classes behave differently in semantic terms with respect to their interrogative complements but have not so far fully understood how or why. This book seeks to explore and to provide solutions to this and to related problems in explaining the meaning and grammar of embedded interrogatives and the predicates that take interrogative complements. The investigation extends to the semantics of adverbs of quantification, theories of plurals and

lexical selection The work is addressed to those working in semantics and to syntacticians concerned with the constraints that syntactic structure imposes on semantic interpretation It is at the heart of current research in the syntax semantics interface Although some knowledge of formal semantics is assumed the book has been written to be accessible to researchers in computer science philosophy and cognitive science *Observing Projects Using Starry Night Enthusiast* Marcel W.
