catching up with its chip building ambitions and military modernization going hand in hand America has let key components of the chip building process slip out of its grasp contributing not only to a worldwide chip shortage but also a new Cold War with a superpower adversary that is desperate to bridge the gap Illuminating timely and fascinating Chip War shows that to make sense of the current state of politics economics and technology we must first understand the vital role played by chips Amazon **Popular Photography** ,1992-06 **British Journal of Photography** ,2003 PC Mag ,2003-05-27 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
