Evan Rapport outlines the ways in which punk developed out of dramatic changes to America's cities and suburbs in the postwar era especially with respect to race. The musical styles that led to punk included transformations to blues resources, experimental visions of the American musical past and bold reworkings of the rock and roll and rhythm and blues sounds of the late 1950s and early 1960s, revealing a historically oriented approach to rock that is strikingly different from the common myths and conceptions about punk. Following these approaches, punk itself reflected new versions of older exchanges between the US and the UK, the changing environments of American suburbs and cities and a shift from the expressions of older baby boomers to that of younger musicians belonging to Generation X. Throughout the book, Rapport also explores the discourses and contradictory narratives of punk history which are often in direct conflict with the world that is captured in historical documents and revealed through musical analysis.
