Modern Mathematics Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics

movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends

School-based food and nutrition education Food and Agriculture Organization of the United Nations ,2020-12-10 School based food and nutrition education SFNE helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks build the capacity to change and to adapt to external change and pass on their learning to others SFNE has also an important role in complementing efforts that are being made globally to improve food environments and in empowering children and adolescents to become active participants in shaping the food system to be better able to deliver healthy and sustainable diets Despite increasing interest for SFNE the evidence that supports it and its potential much of traditional SFNE particularly in LMICs is largely underfunded not delivering results and disconnected from other key interventions that aim to support the food nutrition environment and education nexus SFNE is under resourced with capacity development opportunities lacking throughout the school system This White Paper is the first document of its kind and it is based on the evidence professional expertise and field experience lessons learned and documented challenges of SFNE work in a variety of contexts It presents the case for raising the profile and transforming the vision and learning model of SFNE This document is directed firstly to a technical audience working in governmental organizations that deal with schoolchildren and adolescents and is also of interest to researchers technical advisors decision makers donors and investors civil society and UN organizations
