The Encyclopedia of Libertarianism Ronald Hamowy, 2008-08-15 As a continuation of the older tradition of classical liberalism libertarian thinking draws on a rich body of thought and scholarship Contemporary libertarian scholars are continuing that tradition by making substantial contributions to such fields as philosophy jurisprudence economics evolutionary psychology political theory and history in both academia and politics With more than 300 A to Z signed entries written by top scholars The Encyclopedia of Libertarianism is purposed to be a useful compilation of and introduction to libertarian scholarship The Encyclopedia starts with an introductory essay offering an extensive historical and thematic overview of key thinkers events and publications in the development of libertarian thought The Reader's Guide groups content for researchers and students alike allowing them to study libertarianism topically biographically and by public policy issues Key Features Entries conclude with bibliographies and references for further reading and cross references to related entries Each entry provides an introduction to a topic or policy question relevant to libertarianism or a biography of a person who has had an impact on libertarianism Editors take special care to ensure entries clearly explain libertarian approaches to issues do not take sides on disputed matters or engage in polemics and represent the views of all sides fairly and accurately

Overshoot William R. Catton, 1982-06 Our day to day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy natural resources and consumer goods Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves And for years some biologists have warned us of the direct correlation between scarcity and population growth These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology A calm but unflinching realist Catton suggests that we cannot stop this wave for we have already overshoot the Earth's capacity to support so huge a load He contradicts those scientists engineers and technocrats who continue to write optimistically about energy alternatives Catton asserts that the technological panaceas proposed by those who would harvest from the seas harness the winds and farm the deserts are ignoring the fundamental premise that the principals of ecology apply to all living things These principles tell us that within a finite system economic expansion is not irreversible and population growth cannot continue indefinitely If we disregard these facts our sagging American Dream will soon shatter completely
