7 pages | 1671 words

Abstract

The purpose of this research paper is to focus on how the education system has evolved over the years. From the time of Britishers to now, there have been various changes that can be seen in the present-day scenario. The paper talks about how education system has modernized and its effects on the present-day scenario in education. This paper also intends to focus on the impact of modern variations and its impact on the minds of the youth. The paper also focuses on whether the evolution of education over the years has a profound effect on the minds or not.

Introduction

The education system in India has evolved in various aspects since ancient time. Diversity in fundamentals like language, culture and dialect etc. are unique things about Indian education system. In the times of yore, India had the Gurukul System of education where the teacher and the pupils stayed together in a distant place. They were taught philosophy, arts, science administration and military techniques. Guru was considered the central persona and the students returned the favor by helping their teacher in their daily chores. Example - women like Gargi and Maitreyi were prominent personas. They participated in scholarly researches and educational debates. During medieval period Vedic schools and Madrasas were dominant before Britishers came into power. The Britishers introduced the modern education. They brought English language to India and the syllabus was limited to modern and specific subjects like science, mathematics, language, history, geography and civics. Philosophy and metaphysics were considered unnecessary at the school level education. the teacher student relationship became stronger since the mode of teaching was mainly confined to the classroom. After India got independence from British rule, the modern education system gradually evolved and progressed over time. There are four levels in the Indian education system. They are pre-primary, primary, secondary and higher secondary. Central Board of Secondary Education (CBSE) and Indian Certificate of Secondary Education (ICSE) are two important state boards. However, with the introduction of E-Learning through technology many schools are moving towards digitization's have increased their student's engagement with the smart teaching techniques like digital textbooks and e-learning. From teaching religion, Vedas, scriptures etc. to coaching technologies like virtual reality, programming- there has been a major change in the Indian education system. Many English medium schools also came into existence that are giving the best of education and co-scholastic outlook to the students.

What Is Modern Education?

Before modern education came into existence, the traditional way of teaching was followed. Also known as customary education, the main motive of traditional education is to inculcate the values, manners skills and the social practice to the next generation which is considered necessary for their survival. A student learns about the customs and tradition of the society in traditional education system. A traditional classroom is a place where a teacher is the knowledge provider and the student play a passive role. Student is a mere listener who only focuses on absorbing the knowledge that's being imparted by the student, with very less contribution of their own. Also, there is no use of science and technology...
