New Places: Shakespeare and

Civic Creativity Paul Edmondson, Ewan Fernie, 2018-04-05 New Places Shakespeare and Civic Creativity documents and analyses the different ways in which a range of innovative projects take Shakespeare out into the world beyond education and the theatre. Mixing critical reflection on the social value of Shakespeare with new creative work in different forms and idioms, the volume triumphantly shows that Shakespeare can make a real contribution to contemporary civic life. Highlights include Garrick's 1769 Shakespeare ode, its revival in 2016, and a devised performance interpretation of it; the full text of Carol Ann Duffy's *A Shakespeare Masque* set to music by Sally Beamish; a new Shakespearean libretto inspired by Wagner; an exploration of the civic potential of new Shakespeare opera and ballet; a fresh Shakespeare-inspired poetic liturgy including commissions by major British poets; a production of *The Merchant of Venice* marking the 500th anniversary of the Venetian Jewish Ghetto; and a remaking of *Pericles* as a response to the global migrant crisis.

Architectural Possibilities in the Work of Eisenman Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings, revealing underlying characteristics and arguing for their productive continuity and transformative role. The book explores Eisenman's approach to architectural form generation and thinking. It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s. Following an introductory chapter addressing the theme of potentialities, the book is organised in two parts. The first part focuses on key period writings of Eisenman, framing the close reading around a practice of resistance, the architect's approach to history as analysis, and the transformative conceptualisation of time. In the second part, the book undertakes an analysis of select projects from the 1980s and 1990s. Three formal preoccupations and conceptual orientations ground manipulations, figuration, and spatial events. This part of the book previously unpublished material from the Peter Eisenman fonds, Canadian Centre for Architecture, Montréal, provides primary source material. A concluding chapter addresses Eisenman's teaching, its relation to his larger project, and possible legacies for educators, practitioners, scholars, and theorists.

The Architecture and Philosophy of Peter Eisenman Stefano Corbo,2016-04-15 Peter Eisenman is one of the most controversial protagonists of the architectural scene who is known as much for his theoretical essays as he is for his architecture While much has been written about his built works and his philosophies most books focus on one or the other aspect By structuring this volume around the concept of form Stefano Corbo links together Eisenman s architecture with his theory From Formalism to Weak Form The Architecture and Philosophy of Peter Eisenman argues that form is the sphere of mediation between our body our inner world and the exterior world and as such it enables connections to be made between philosophy and architecture From the start of his career on Eisenman has been deeply interested in the problem of form in architecture and has constantly challenged the classical concept of it For him form is not simply a cognitive tool that determines a physical structure which discriminates all that is active from what is passive what is inside from what is outside He has always tried to connect his own work with the cultural manifestations of the time firstly under the influence of Colin Rowe and his formalist studies secondly by re interpreting Chomsky s linguistic theories in the 80 s by collaborating with Derrida and his de constructivist approach more recently by discovering Henri Bergson s idea of Time These different moments underline different phases different projects different programmatic manifestos and above all an evolving notion of form Taking a multi disciplinary approach based on the intersections between architecture and philosophy this book investigates all these definitions and in doing so provides new insights into and a deeper understanding of the complexity of Eisenman s work **Integrating Music Across the Elementary Curriculum** Kristin Harney,2020 This book is designed

to support K 5 classroom teachers as they integrate music throughout the elementary curriculum It contains detailed practical ideas and examples including full lesson plans and over 100 teaching ideas and strategies for integrating music with visual art language arts social studies science and mathematics Following an overview of the interdisciplinary approach the remaining chapters explore connections between music and other areas of the elementary curriculum Each chapter also

includes a section addressing national standards with tables showing the specific standards that are included in each lesson and activity This text utilizes the most recent National Core Arts Standards 2015 as well as the most recent standards in mathematics science social studies and language arts All the lessons in this book are designed to be fully taught by classroom teachers the content is accessible to those who lack formal music training yet is solidly rooted in research and best practices While classroom teachers can teach these lessons on their own this book may facilitate partnerships and collaboration between classroom teachers and music specialists All the lessons and activities included in this text have been reviewed by practicing teachers and most have been field tested in elementary classrooms Throughout the book there is an emphasis on interdisciplinary lessons that demonstrate valid connections between disciplines while maintaining the integrity of each discipline involved including a teacher tested model that allows teachers to successfully create their own interdisciplinary lessons
