

SONY

HDR-FX1

HDV 1080i Camcorder

- Stop-up Feature
- Slow Feature

World's FIRST Recording & Playback Consumer HDV 1080i Camcorder.

3-1/2" 16:9 Advanced

WEGA™ CCD Imagers 1,000 Pixels Green
Advanced WEGA™ (Wide Accumulation-Mode) CCD imagers with 1,500K effective pixels provide excellent detail and clarity with exceptional digital video performance. Using a 3-chip Advanced WEGA™ CCD system, and dichroic glass to separate color information, colors are extremely accurate, and color "bleeding" and "smearing" are greatly reduced.

Advanced WEGA™ CCD Technology

Enhanced CCD design allows more light to reach the imager, which reduces video noise, to improve signal-to-noise ratio by up to 6dB (2x better than a standard CCD). Particularly effective when shooting in dark situations.

HDV Recording Format

From the innovators in camcorder technology, Sony's HDV 1080i camcorder is the world's first HDV 1080i consumer level camcorder and player. Now you can record all your memories in true high-definition video.

Stills feature HDV/SD Format Recording

The HDR-FX1 is capable of recording and playing back both High Definition and Standard Definition video recorded on standard MiniDV cassettes.

Real-Time HD-Codec Engine

A Sony developed Real Time MPEG2 Encode/Decode system with reduced image compression and compact size to fit inside a personal camcorder. Provides efficient MPEG2 compression, and recording and playback of clear HD images at the same bit rate of the SD format. Ideal for High Definition video capture recorded on the same cassette, as are used for SD/HD recording.

12X Optical Carl

Zenith Vario-Sonnar™ T* Lens
From the authority in lens technology, the Carl Zeiss® Vario-Sonnar T* lens provides a high quality 12x optical zoom which maintains image clarity and color while reducing glare and flare.

1.5" Wide Precision Hybrid Switchless™ LCD Display (260K Pixels)

Provides excellent viewing clarity with improved resolution. The 260K pixel LCD display makes images sharp and detailed during playback or when monitoring recording. The Hybrid Reflective Transmissive LCD Screen provides accurate viewing in sunlight or bright light, virtually eliminating the "washout" common with traditional LCD Screens.

Super Steady Shot®

Optical Stabilization System
An advanced form of Sony's SteadyShot Image Stabilization system that controls an even higher range of shake and vibration frequencies. This optical stabilization system achieves an even higher level of smoothness without degradation of video through digital stabilization systems.

Analog/Digital Conversion with Pass-Through

Convert and/or record any analog NTSC video source to digital video in transmitting mode. Analog NTSC video can also be passed through the digital Hi8cam camcorder directly into a PC via the IEEE1394 interface in real time for easy PC editing of your analog footage.

Manual Zoom and Manual Focus Ring

Full independent Zoom and Focus rings provide precise and detailed control over the amount of zoom and the precise focus of the image with just a touch of the rings. Fast manual focusing when zooming, and fine detailed focusing in zoom with the manual "Feel"

of the rings.

Expanded Focus Indicator

Zoomware's LCD image is magnified, temporarily, up to 4x its original size without any loss of definition. This allows the user maximum control while focusing the camera for greater detail and clarity.

Picture Profile

Allows the user to set manual adjustments for a scene (color, sharpness, white balance, etc.) into any one of 8 presets, so they can be called up at just the touch of a button. Useful when shooting under the same conditions regularly, so options do not have to be set each time. Settings for various shooting conditions are offered as defaults.

CineFrame™ Recording

Provides the option of recording video at either 30 frames with a feeling of "film-like" 24 fps.

Assignable Buttons

Three buttons on the exterior of the camcorder are user-assignable so that they correspond to the options most commonly utilized for ease of recording.

LINKED DV Interface (IEEE 1394)

A high speed bi-directional digital video with communication between two compatible devices equipped with LINKED DV interface, including camcorders, digital VCRs, and PCs.

Shot Transition

Allows for a smooth automatic scene transition. Settings for focus, zoom, iris, gain, shutter, and white balance can be set to the AUTO button and a smooth function will take place according to the set time. This function enables the focus to gradually shift from the front of the scene to a deeper part of the scene, thus the iris enables a smooth change of depth of field.
