

MAIN FEATURES

High Quality Triax Transmission

The CCU-TX7P also employs analogue component video transmission, with a 30MHz bandwidth for the luminance (Y) signal and 4.5MHz for the colour difference signals (R-Y/B-Y). This assures high quality and the provision of various video outputs from the CCU.

Long Distance Transmission

Cable length can be extended up to a maximum of 1500m via ø14.5mm triax cable (with return video) (Fujikura), 1125m via ø13.2mm cable (Belden) or 750m via ø8.5mm cable (Fujikura, Belden). Teleprompter video channel can also be transmitted over a limited length of cable.

High Speed High Quality Serial Data Transmission

Data at up to a resolution of 10-bits can be transmitted with high speed via serial data transmission using a triax cable. This provides the benefits of smooth, real-time control with instant tactile response from remote control devices.

AC/ DC Operation

The CCU-TX7P is designed to operate on not only AC but also DC power with both an AC inlet and, for DC 12V (10.5V to 17V), a DC inlet. DC operation greatly expands system flexibility in outside broadcast applications.

Digital Signal Outputs

The CCU-TX7P provides two SDI outputs when the optional DXBK-701 SDI Output Board is installed. It can

transfer high quality digital signals with just one cable to SDI ready units. Using the SDI interface, a total digital DXC system becomes a reality.

Note* The CCU-TX7P (Serial No. less than 41000) needs some modification to accommodate the SDI outputs. Please contact your nearest Sony office.

Other Signal Outputs

The CCU-TX7P provides two composite outputs, and two component output selectable from Y/R-Y/B-Y, R/G/B and Y/C. The CCU-TX7 also has a 4-pin WF MODE (waveform monitor mode) connector for flickerless parade monitoring of signals, in addition to a WF output and a PIX (picture monitor) output.

Two Inputs for Return Video

The CCU-TX7P has two RETURN VIDEO inputs (BNC type) and therefore accept return video signals (VBS colour) from two different systems. Two channels of return video can be selected from the Sony CA-TX7P Camera Adaptor.

Colour Teleprompter Facility

The CCU-TX7P can be used with colour teleprompter facilities. Since reverse signal transmission (CA -> CCU) is supported using a teleprompter video channel in a triax cable, it is also possible to transmit video signals other than those for teleprompter from CA to CCU, if necessary.

* For detailed information, please contact your nearest Sony office.

Sony Ccu Tx7p Manual
