*A User's Guide to the Age of Tech* Grant Wythoff, 2025-05-27 How users experience and influence technological change when so much of that change feels out of our control Every day we casually employ one of the most complex tools ever created using it to read the news plan our day and connect with friends In *A User's Guide to the Age of Tech* Grant Wythoff investigates the process by which now ubiquitous technologies like our phones become integrated into our lives showing how the gadget stage before devices are widely adopted opens the door for users to co create these technologies and adapt them toward unexpected ends In this elegant approachable work Wythoff offers a view of how users make new technology their own subverting dominant power structures and imagining uses never intended by their creators Rooted in a detailed look into the history of technique focusing on how we do things with tools rather than the tools themselves *A User's Guide to the Age of Tech* proceeds to complicate and influence discussion of subjects like the digital divide and AI Drawing on a range of sources including novels patents and newspapers Wythoff explores the vernacular philosophies that have emerged from users and their diverse everyday practices

bringing down to earth the conversation about digital titans away from the abstracted domains of server farms and algorithms Lodging a passionate argument that we know ourselves better than the data brokers who appear to wield influence over our psyches Wythoff invites readers and tech users to imagine their own digital technique acknowledge their vast expertise and see its immense value Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

[Human and Automatic Speaker Recognition over Telecommunication Channels](#) Laura Fernández Gallardo,2015-08-17 This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation codecs and electro acoustic user interfaces among other impairments Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth together with an insight into how speaker specific characteristics of speech are preserved through different transmissions It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths such as wideband and super wideband
