Accessing Voice Tracks on Your Computer

Your voice recorder will function on your computer much like a USB flash drive.

1. Pop off the USB cap (See diagram at left)
2. Plug the USB connector into an available USB port on our computer
3. Your computer will install any required drivers automatically and usually present you with a pop-up window when ready. Click "Open Folder to View Files"
4. You will see a window with files and folders. All your voice files will be in the VOICE folder. Double click on this to open it.
5. Your files will be in one of the FOLDERS listed, typically FOLDER01. The file name will be the date in YYMMDD format with a 3-digit sequential number for order. Example: The second recording on January 25, 2010 will be named: 100125-001.mp3
6. To copy this to your machine, simply drag & drop it to your desktop or My Documents (or another location if you have it.)
7. To Rename your file (and make sure you are listed as the author) Right Click on the filename and select **Properties** from the popup menu.
 - Rename the file on the General Tab at the top; delete what is there and type a meaningful name *Be sure to keep the .mp3 ending.
 - Click on the Details tab to insert your name where it says Artists. Click to the right of Artists to bring up the typing box. When you are done, click OK.
8. To play the file, simply double click on it. It will play in any current media player.
9. To edit the file you will need a program such as Audacity (available as free download) - but this is not necessary for basic podcasting, only getting rid of unwanted material.
10. File can be inserted into Blackboard using Add Item in any content area.
