formation of mixed patterns as well as native like patterns which are mainly constrained by linguistic factors such as the type of sentence and the position of the tonal event in the utterance The results are discussed within Mennen's 2015 L2 Intonation Learning theory and lead to the formulation of a Developmental L2 Intonation Hypothesis that makes several generalizations to characterize interlanguage intonation This volume not only represents a step forward in the study of the acquisition of L2 intonation in general but also offers valuable findings that can be directly or indirectly applied in the classroom and will hopefully inspire further research
