Education under Siege Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country's economic success recent UK governments have insisted their reforms are the only way to make England's system world class Yet pupils are tested rather than educated teachers bullied rather than trusted and parents cast as winners or losers in a gamble for school places *Education under siege* considers the English education system as it is and as it might be In a highly accessible style Peter Mortimore an author with wide experience of the education sector both in the UK and abroad identifies the current system's strengths and weaknesses He concludes that England has some of the best teachers in the world but one of the most muddled systems Challenging the government's view that there is no alternative he proposes radical changes to help all schools become good schools They include a system of schools receiving a fair balance of pupils who learn easily and those who do not ensuring a more even spread of effective teachers as well as banning league tables outlawing selection opening up faith schools and integrating private schools into the state system In the final chapter he asks readers who share his concerns to demand that the politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the future education of our children

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

14-18 - A New Vision for Secondary Education Kenneth Baker, 2013-01-24 Former Secretary of State for Education

Kenneth Baker claims that secondary education has become a five year programme with a single narrow aim to prepare pupils for high stakes GCSE exams at 16 From 2015 all young people will be legally required to stay in education or training until they are 18 Kenneth Baker sees this as a historic opportunity to re think the aims and structure of English education He argues that the National Curriculum should extend only to the age of 14 and that there should be four distinct pathways from 14 18 to take account of young people s emerging interests talents and ambitions Liberal Arts Technical Sports and Creative Arts and Career All pathways will provide a broad education but each will have a distinctive character matched to the talents and ambitions of individual students In 14 18 A New Vision for Secondary Education Kenneth Baker builds a compelling case for reform with contributions from a range of educationalists who draw on the history of English education practice elsewhere in the world and their experiences An essential read for anyone interested in the future of secondary education
