Snow and Water

### Water

Water is a substance in our world. First, it is a liquid. Which means it can flow. Water is also a lot of fun. You can splash in puddles or make snow. When you drink it, or it falls from the sky, it can change its state. It can freeze, or steam when it is hot. It is very important for life. Every living thing needs water to survive. Which means we can find it in many places. Interestingly, water cannot be compressed. It takes up space that doesn't change. Sometimes it's warm. See in a flash you can see through it.
