systematically teach semiconductor engineering From 1975 when the nation had barely begun producing its first transistors to 2008 when he retired from teaching Kim trained more than 100 students effectively creating the first two generations of South Korean semiconductor experts Source IEEE Spectrum October 2002 *Webmasters Guide To The Wireless Internet* Syngress,2001-12-03 The wireless Web is a reality don t get left behind The wireless Web is not a future dream It is here today Already more than 20 million people have access the Internet through PDAs mobile phones pagers and other wireless devices What will people find on the Wireless Internet This is the question that every Webmaster and Web developer is being challenged to answer The Webmaster s Guide to the Wireless Internet provides the Wireless Webmaster with all of the tools necessary to build the next generation Internet Packed with the essential information they need to design develop and secure robust e commerce enabled wireless Web sites This book is written for advanced Webmasters who are experienced with conventional Web site design and are now faced with the challenge of creating sites that fit on the display of a Web enabled phone or PDA The rapid expansion of wireless devices presents a huge challenge for Webmasters this book addresses that need for reliable information There are lots of books for wireless developers this is the first designed specifically for Webmasters Looks at security issues in a Wireless environment *Computer Buyer's Guide and Handbook* ,2001-07

Rich's High-tech Business Guide to Silicon Valley and Northern California ,1992 *Solaris 8 Administrator's Guide* Paul A. Watters,2002-01-22 The Solaris operating system along with related Sun products like Java is one of the most reliable and scalable platforms on which to build e commerce products and on which to support all networked services Yet one problem that potential users face is finding out more information about what Solaris offers In a sense they want to know how much technical work is involved in migrating to Solaris and what kind of philosophy Solaris is based on To answer these questions *Solaris 8 Administrator's Guide* covers all aspects of deploying Solaris as a network server including both basic and advanced network services Given newfound interest in Solaris as an enterprise network operating system this guide is aimed squarely at supporting enterprise level services It s written for experienced network administrators who want an objective guide to networking with Solaris and covers installation on both the Intel and Sparc platforms With it you will learn how to setup Solaris as a file server application server and database server In its coverage of advanced topics *Solaris 8 Administrator's Guide* offers examples of configuration files and the installation of third party software packages This comprehensive book also contains more conceptual and difficult material that is absent from other Solaris reference manuals At all points emphasis is placed on issues like evaluating the security scalability and reliability of specific software packages at the expense of providing detailed coverage of every available package The book covers the practical experience and new skills needed to understand the impact of new services and new software products on existing server systems Author Paul Watters a recognized authority on Solaris avoids so called historical services like UUCP which can easily fill chapters but are not commonly found in today s production environments Indeed he doesn t bother to provide an in depth history of Solaris or

UNIX at all assuming that you can find this material elsewhere Instead the practical focus is on supporting relevant contemporary networking technologies Solaris 8 Administrator's Guide provides you with a third party view that not only praises Solaris but is critical and realistic in its assessment This book is for experienced Solaris Administrators as well as and those looking to migrate to this operating system *Official Gazette of the United States Patent and Trademark Office*, 2002
