Addresses recent advances from both the clinical and technological perspectives to provide a comprehensive presentation of m-Health. This book introduces the concept of m-Health, first coined by Robert S. H. Istepanian in 2003. The evolution of m-Health since then, how it was transformed from an academic concept to a global healthcare technology phenomenon, is discussed. Afterwards, the authors describe in detail the basics of the three enabling scientific/technological elements of m-Health: sensors, computing, and communications, and how each of these key ingredients has evolved and matured over the last decade. The book concludes with a detailed discussion of the future of m-Health and presents future directions to potentially shape and transform healthcare services in the coming decades. In addition, this book discusses the rapid evolution of m-Health in parallel with the maturing process of its enabling technologies, from bio-wearable sensors to the wireless and mobile communication technologies from IOT to 5G systems and beyond. Includes clinical examples and current studies, particularly in acute and chronic disease management, to illustrate some of the relevant medical aspects and clinical applications of m-Health. Describes current m-Health ecosystems and business models. Covers successful applications and deployment examples of m-Health in various global health settings, particularly in developing countries. **Handbook of Sport Neuroscience and Psychophysiology** Roland Carlstedt, 2018-10-09.  the illusion of benevolence it is this country's largest industry with only one edict charge as much as the market will bear So
 before we start lauding the abilities of AI to revolutionize healthcare let's take a look at what is really going on Moore's Law
 indicates that without strategic advances in AI robotic healthcare the global healthcare system will collapse in eight years
 AUTONOMOUS LETHALITY if AI were to take on human form devoid of morals unable to experience empathy and untouched
 by fear we would undoubtedly label such a being as an extremely dangerous psychopath Yet these same attributes conspire
 to give birth to weaponized autonomy the new face of armed conflict Moore's Law predicts that within the next five years we
 will lose control of autonomous lethality as macro drones and bio bots upend the society's balance of checks and measures
