Re/Writing the Center Susan Lawrence, Terry Myers Zawacki, 2019-03-15 *Re Writing the Center* illuminates how core writing center pedagogies and institutional arrangements are complicated by the need to create intentional targeted support for advanced graduate writers Most writing center tutors are undergraduates whose lack of familiarity with the genres preparatory knowledge and research processes integral to graduate level writing can leave them underprepared to assist graduate students Complicating the issue is that many of the graduate students who take advantage of writing center support are international students The essays in this volume show how to navigate the divide between traditional writing center theory and practices developed to support undergraduate writers and the growing demand for writing centers to meet the needs of advanced graduate writers Contributors address core assumptions of writing center pedagogy such as the concept of peers and peer tutoring the emphasis on one to one tutorials the positioning of tutors as generalists rather than specialists and even the notion of the writing center as the primary location or center of the tutoring process *Re Writing the Center* offers an imaginative perspective on the benefits writing centers can offer to graduate students and on the new possibilities for inquiry and practice graduate students can inspire in the writing center Contributors Laura Brady Michelle Cox Thomas Deans Paula Gillespie Mary Glavan Marilyn Gray James Holsinger Elena Kallestinova Tika Lamsal Patrick S Lawrence Elizabeth Lenaghan

Economics Rules: The Rights and Wrongs of the Dismal Science Dani Rodrik, 2015-10-13 A hugely valuable contribution In setting out a defence of the best in economics Rodrik has also provided a goal for the discipline as a whole Martin Sandbu Financial Times In the wake of the financial crisis and the Great Recession economics seems anything but a science In this sharp masterfully argued book Dani Rodrik a leading critic from within takes a close look at economics to examine when it falls short and when it works to give a surprisingly upbeat account of the discipline Drawing on the history of the field and his deep experience as a practitioner Rodrik argues that economics can be a powerful tool that improves the

world but only when economists abandon universal theories and focus on getting the context right Economics Rules argues that the discipline's much derided mathematical models are its true strength Models are the tools that make economics a science Too often however economists mistake a model for the model that applies everywhere and at all times In six chapters that trace his discipline from Adam Smith to present day work on globalization Rodrik shows how diverse situations call for different models Each model tells a partial story about how the world works These stories offer wide ranging and sometimes contradictory lessons just as children's fables offer diverse morals Whether the question concerns the rise of global inequality the consequences of free trade or the value of deficit spending Rodrik explains how using the right models can deliver valuable new insights about social reality and public policy Beyond the science economics requires the craft to apply suitable models to the context The 2008 collapse of Lehman Brothers challenged many economists' deepest assumptions about free markets Rodrik reveals that economists' model toolkit is much richer than these free market models With pragmatic model selection economists can develop successful antipoverty programs in Mexico growth strategies in Africa and intelligent remedies for domestic inequality At once a forceful critique and defense of the discipline Economics Rules charts a path toward a more humble but more effective science
