**Recurrent Implantation Failure** Jason M. Franasiak, Richard T. Scott Jr., 2018-04-03 This unique text discusses the wide range of causes and pathophysiologic conditions contributing to recurrent implantation failure (RIF) and the current treatment approaches to best approach this challenging patient population. Beginning with a presentation of the mechanism of normal implantation, the physiologic synchrony between embryo and endometrium and the roles of both gametes and embryos in RIF, the book then examines the various genetic, immune and environmental factors involved. Abnormalities of the hematologic and endocrine system as well as those of the anatomy and microbiome are described in detail. Last but no less important, the psychological stress and treatment of patients experiencing RIF is discussed. Assisted reproductive technology (ART) success has increased substantially over the past three decades. However, despite these advances, recurrent implantation failure is still a common issue confronting patients and clinicians, and RIF represents one of the greatest challenges in ART and remains a source of frustration and disappointment for patients, clinicians and researchers involved in the process. Providing an in-depth investigation into the pathophysiology and biological mechanisms of RIF and its clinical management, this will be an excellent resource for reproductive endocrinologists and infertility specialists.

**Principles of Research Methodology and Ethics in Pharmaceutical Sciences** Vikas Anand Saharan, Hitesh Kulhari, Hemant R Jadhav, 2024-08-30 Pharmaceutical researchers are constantly looking for drug products, drug delivery systems and devices for improving the health of society. A scientific and systematic search for new knowledge requires a thorough understanding of research methods and hypothesis design. This volume presents pharmaceutical research through theoretical concepts, methodologies and ethical issues. It fulfills publication ethics course work requirements for students. Chapters have been designed to cater for the curriculum requirements of universities globally. This serves as a guide on how to apply concepts in designing experiments and transforming laboratory research into actual practice. Features: Complete coverage of research methodology courses for graduate and postgraduate

students globally Step by step assistance in writing technical reports projects protocols theses and dissertations Experimental designing in pharmaceutical formulation development and preclinical research designs Ethics in using animals in preclinical research and humans in clinical research Publication ethics best practices and guidelines for ensuring ethical writing Hypothetical and real world case studies on ethical issues and measures for prevention and control

### **Neurogenic bladder and bowel dysfunction**

Peter Wide, 2020-09-11 Spinal dysraphism SD is a congenital malformation that to a varying extent often severely affects the life of the child and the family Most individuals with SD suffer from neurogenic bladder and bowel dysfunction with the risk of urinary tract infections renal deterioration urinary and fecal incontinence that affects social participation and quality of life negatively In newborns with SD early detection of neurogenic bladder dysfunction and determination of post void residual urine are required to determine the need of clean intermittent catheterization CIC and follow up The non invasive method of four hour voiding observation with provocation test VOP was used to evaluate bladder function in 50 newborn children with SD Voiding patterns for the children were described and compared with those of 50 healthy newborns evaluated with VOP in an earlier study Comparison revealed significant differences among several variables In particular leakage at provocation test and not voiding with a stream were common in newborns with SD but did not occur in healthy newborns VOP is a non invasive standardized method to determine residual urine in newborns with SD It also adds information on voiding pattern frequency voiding with a stream and leakage at provocation Findings in neonatal VOP of the same cohort of newborns with SD were then related to radiology presence of urinary tract infections during the first year and urodynamic findings and use of CIC at the age of one year It was found that in children with SD not voiding with a stream may have a predictive value for the need of CIC at the age of one year followed probably by lifelong CIC Despite this the presence of an open SD per se has stronger predictive value and each child needs to be evaluated individually while considering a number of factors The main value of VOP may be as a structured non invasive screening method to uncover neurogenic bladder sphincter dysfunction in the newborn Studies with a larger number of subjects than the present are needed to evaluate the potential of VOP in newborns with closed spinal dysraphism in whom the neurological consequences vary A retrospective analysis detected renal damage on DMSA scintigraphy in 5 of 41 children with SD who were followed according to a proactive national program with minimal use of surgery Median follow up time was 10 years High baseline pressure was confirmed as a risk factor for renal damage Compliance with treatment and follow up is likely to be an important factor for renal health Therefore efforts to support children and their families are crucial A questionnaire based study of 107 children with SD age 6-16y in Sweden and Norway examined aspects of treatment for neurogenic bowel dysfunction focusing on incontinence independence general satisfaction and quality of life It was found that transanal irrigation TAI and antegrade colonic enemas ACE are effective treatments but are time consuming and difficult to perform independently The majority of children using TAI 72% and ACE 63% never went to the toilet alone to empty their

bowels As children achieving independence on the toilet reported higher quality of life efforts to support independence are beneficial Continent self managing children with healthy kidneys enjoy high quality of life and contribute more fully to society Therefore further research is required to investigate and develop existing and new technologies and methods that mitigate the problems related to SD and to make them accessible to all children with spinal dysraphism Under de senaste 50 ren har det skett en enast ende utveckling av m jligeterna f r barn som f ds med ryggm rgsbr ck Tidigare har majoriteten av barn med ryggm rgsbr ck avlidit redan som sp dbarn men idag verlever de flesta till vuxen lder Utan aktiva insatser och uppf ljning r dock risken f r medicinska problem och allvarlig p verkan p livet mycket stor Nu n r n stan alla barn verlever ligger fokus p att ocks n okad livskvalitet och sj lvst ndighet f r personer med ryggm rgsbr ck N stan alla med ryggm rgsbr ck m ste hantera en allvarlig p verkan p bl san och tarmen med risk f r njurskador inkontinens och f r stoppning I avhandlingens tv f rsta studier v rderade vi en metod att med minimalt obehag f r barnet bed ma bl sfunktionen Detta f r att kunna skilja ut de barn som beh ver genomg mer avancerade unders kningar och f hj lp med bl st mningen genom t ta tappningar med kateter sa kallad ren intermittent kateterisering RIK N r vi j mf rde resultatet av testet f r 50 nyf dda med ryggm rgsbr ck med samma unders kning av 50 friska nyf dda fann vi stora skillnader Mest tydligt var att de flesta nyf dda med ryggm rgsbr ck 69% men inga friska nyf dda l ckte urin n r man tryckte ver bl san Av nyf dda med ryggm rgsbr ck kissade de flesta 74% inte med str le vilket alla friska nyf dda gjorde Att inte kissa med str le talade ocks starkt f r att barnet skulle komma att beh va hj lp med RIK f r att tomma bl san vid ett ars lder och d sannolikt livet ut Sammantaget visade avhandlingens tv f rsta arbeten att den metod f r bed mning av bl sfunktion vi unders kt kan anv ndas f r att styra uppf ljning och behandling av nyf dda med ryggm rgsbr ck Avhandlingens tredje studie visade att aktiv uppf ljning av barnen enligt ett nationellt v rdprogram lyckades f rhindra njurskador hos de flesta men att h ga tryck i urinbl san och terkommande urinv gsinfektioner kade risken f r skador ven familjernas f rm ga att i en pressad vardag klara av att genomf ra de ofta kr vande behandlingar och unders kningar som rekommenderas verkade vara viktig f r att f rhindra njurskador St ttning av familjerna r d rf r viktig Avhandlingens fj rde arbete ber rde tarmen som n stan alltid r p verkad vid ryggm rgsbr ck med risk f r sv r f r stoppning och avf ringsl ckage Detta har p taglig p verkan p barnen och deras familjer En tredjedel av de 107 familjerna i v r enk tunders kning i Sverige och Norge barn 6 16 r beskrev att man f tt avst fr n aktiviteter s som resor p grund av barnets tarmproblem och de barn som hade avf ringsl ckage rapporterade tydligt l gre livskvalitet n andra Trots denna allvarliga p verkan finns det hittills inga studier som j mf r de olika behandlingar som barnet kan anv nda I v r enk t kartlade vi d rf r vilka metoder som anv ndes och hur bra de fungerade Vi st llde fr gor till b de barn och f r ldrar s rskilt om avf ringsl ckage hur n jd man var med metoden barnens livskvalitet och sj lvst ndighet p toaletten Det var utifr n svaren tydligt att b da de vanligaste typerna av tarmsk ljning var effektiva men tidskr vande och svara f r barn och ungdomar att klara att utf ra p egen hand Ingen metod visade sig verl gsen den andra men de barn som klarade att skota tarmtomningen sj lva skattade sin livskvalitet klart h gre n vriga Vi

Mathias Rosenbaum,Luis Alex Kluth,Felix Campos-Juanatey,2022-04-26     **Engineering Health** Lara Marks,2017-10-25

Biotechnology harnesses cellular and biochemical systems to advance knowledge of the molecular cause of disease and to provide new diagnostic tools and more precisely targeted drugs Within a decade global investment in medical biotechnology has increased more than ten fold resulting in therapies for previously untreatable conditions But what exactly is biotechnology and what are its origins What further benefits to human health could it offer in the future Written in an accessible style contributors to this book explore the history behind different biotechnology tools how they are used and how they are reshaping the future of diagnostics therapeutics and vaccines Among the technologies examined are genetic engineering DNA sequencing monoclonal antibodies stem cells gene therapy cancer immunotherapy and the most recent newcomer synthetic biology Applying new biotechnologies in medicine is not without great challenges As medicines shift from small organic molecules to large complex structures such as therapeutic proteins drugs become difficult to make administer and regulate This book will intrigue anyone interested in medicine and how we have been and may continue to engineer better health for ourselves Such changes have major implications for how and where drugs are manufactured the cost of medicine and the ethics of how far society is prepared to go to combat disease

### **MRI-Negative Epilepsy** Elson L. So,Philippe Ryvlin,2015-03-26 Drug resistant epilepsy with negative MRI is frequently seen in patients considered for epilepsy surgery however clinical evaluation and surgical treatment is very

complex and challenging Advanced imaging techniques are needed to detect the location of the epileptogenic zone In most cases intracranial EEG recording is required to delineate the region of seizure onset this carries some risks of major complications Moreover the borders between the recorded seizure onset and the location of important brain functions are often indistinct in MRI negative epilepsy Overall the outcome of MRI negative surgery is less favorable than that of MRI positive surgery but it can significantly improve with optimal management Each chapter critically appraises the role and value of specific diagnostic and treatment techniques to address the challenges of MRI negative epilepsy surgery Authors critique evidence and share their expertise on the diagnostic options and surgical approaches that make epilepsy surgery possible and worthwhile in patients with this condition
