of Department of Defense, 2016-06 UFC 3 580 01 1 Jun 2016 with Change 1 This UFC document provides requirements for designing and implementing interior telecommunications infrastructure for military construction. This infrastructure typically includes telecommunications spaces, pathways, cabling, and interconnecting components. The design of interior telecommunications infrastructure is a specialized technical area. This UFC provides guidance to those parties tasked with implementing existing and emerging interior telecommunications infrastructure requirements. The basic requirements follow industry standards. Due to service-specific unique operating requirements and existing infrastructure and topology, this document includes a chapter for each service. Includes a list of applicable NIST cybersecurity publications for consideration.

Why buy a book you can download for free? First you gotta find it and make sure it's the latest version, not always easy. Then you gotta print it using a network printer you share with 100 other people, and it's outta paper and the toner is low, take out the toner cartridge, shake it, then put it back. If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid 75 an hour has to do this himself, who has assistant's anymore? If you are paid more than 10 an hour and use an ink-jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com. This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly bound, full-size books, 8 1/2 by 11 inches, with glossy covers. 4th Watch Books is a Service Disabled Veteran Owned Small Business (SDVOSB).
