Pearls from a Lost City Roman Duda, 2014-08-07 The fame of the Polish school at Lvov rests with the diverse and fundamental contributions of Polish mathematicians working there during the interwar years. In particular, despite material hardship and without a notable mathematical tradition, the school made major contributions to what is now called functional analysis. The results and names of Banach, Kac, Kuratowski, Mazur, Nikodym, Orlicz, Schauder, Sierpiński, Steinhaus, and Ulam, among others, now appear in all the standard textbooks. The vibrant *joie de vivre* and singular ambience of Lvov's once scintillating social scene are evocatively recaptured in personal recollections. The heyday of the famous Scottish Café, unquestionably the most mathematically productive cafeteria of all time, and its precious Scottish Book of highly influential problems are described in detail, revealing the special synergy of scholarship and camaraderie that permanently elevated Polish mathematics from utter obscurity to global prominence. This chronicle of the Lvov school, its legacy, and the tumultuous historical events which defined its lifespan, will appeal equally to mathematicians, historians, or general readers seeking a cultural and institutional overview of key aspects of twentieth-century Polish mathematics not described anywhere else in the extant English language literature.

The book invokes these themes to reimagine and strengthen teacher education for the future, presenting reports on research, case studies, and theoretical stances. *Future-Proofing Teacher Education* explores what is relevant in teacher education in the 21st century and will be a key reading for researchers, academics, and postgraduate students of teacher education, technology in education, and digital education.
