Narkomania Jennifer J. Carroll, 2019-06-15 Against the backdrop of a post Soviet state set aflame by geopolitical conflict and violent revolution Narkomania considers whether substance use disorders are everywhere the same and whether our responses to drug use presuppose what kind of people those who use drugs really are Jennifer J Carroll's ethnography is a story about public health and international efforts to quell the spread of HIV Carroll focuses on Ukraine where the prevalence of HIV among people who use drugs is higher than in parts of sub Saharan Africa and unpacks the arguments and myths surrounding medication assisted treatment MAT in Ukraine What she presents in Narkomania forces us to question drug policy its uses and its effects on normal citizens Carroll uses her findings to explore what people who use drugs can teach us about the contemporary societies emerging in post Soviet space With examples of how MAT has been politicized how drug use has been tied to ideas of good citizenship and how vigilantism towards people who use drugs has occurred Narkomania details the cultural and historical backstory of the situation in Ukraine Carroll reveals how global efforts supporting MAT in Ukraine allow the ideas surrounding MAT drug use and HIV to resonate more broadly into international politics and echo into the heart of the Ukrainian public

Ukraine is experiencing one of the most severe HIV AIDS epidemics in Europe and the Commonwealth of Independent States CIS with an estimated 230 000 people aged 15 and over living with HIV at the end of 2011 In 2011 the HIV prevalence in adults aged 15 49 in Ukraine was estimated at 0.76% Only slightly more than 124 000 patients with HIV AIDS were under regular medical observation Considering the overall estimation of people living with HIV this suggests that a significant proportion of people with HIV are unaware of their status and therefore unable to take adequate measures to preserve their health or prevent further transmission Although the evidence suggests that incidence among people who inject drugs PWID is declining the number of newly reported HIV cases in the country continued to increase annually from 1999 through 2011 largely due to transmission to sex partners and diagnosis of long standing infections as people developed immunosuppression In 1999 there were 5 827 newly registered HIV cases in 2010 20 489 and in 2011 21 177 The majority of reported cases to date have been among PWID and the prevalence of HIV infection is significantly higher among PWID than in any other at risk population including female sex workers FSWs and men who have sex with men MSM The HIV epidemic is however evolving Annually since 2008 more than half of newly registered HIV cases excluding HIV exposed infants have been attributed to heterosexual transmission and the proportion of cases among PWID has progressively decreased However there is indirect

evidence that the majority of heterosexual cases occur among sexual partners of current or former injection drug users In 2012 a small decrease in cases to 20 754 was reported marking the first annual decrease since 1999 The plateauing in reported cases supports that the bulk of individuals infected during the early wave of the epidemic have been diagnosed and current transmission has been partially controlled The impact of Ukraine s HIV epidemic is exacerbated by a parallel tuberculosis TB epidemic TB is the leading opportunistic infection associated with AIDS morbidity and mortality According to the Ukraine Harmonized AIDS Response Progress Report 2012 in Ukraine in 2011 TB was diagnosed in 5 745 cases or 62.5% of 9 189 new AIDS cases while WHO reports that 19% of the 31 776 TB patients tested for HIV were HIV positive

Pilon,2017-07-05 Sun Tzu author of The Art of War believed that the acme of leadership consists in figuring out how to subdue the enemy with the least amount of fighting a fact that America s Founders also understood and practiced with astonishing success For it to work however a people must possess both the ability and the willingness to use all available instruments of power in peace as much as in war US foreign policy has increasingly neglected the instruments of civilian

power and become overly dependent on lethal solutions to conflict The steep rise in unconventional conflict has increased the need for diplomatic and other non hard power tools of statecraft The United States can no longer afford to sit on the proverbial three legged national security stool military diplomacy development where one leg is a lot longer than either of the other two almost forgetting altogether the fourth leg information especially strategic communication and public diplomacy The United States isn t so much becoming militarized as DE civilianized According to Sun Tzu self knowledge is as important as knowledge of one s enemy if you know neither yourself nor the enemy you will succumb in every battle Alarmingly the United States is deficient on both counts And though we can stand to lose a few battles the stakes of losing the war itself in this age of nuclear proliferation are too high to contemplate *Congressional Quarterly Weekly Report*, 1994-07 **Congressional Record** , **Journal of the Senate of the United States of America** United States.
