## LEVELS OF CULTURE

- **National culture** refers to those beliefs, learned behavior patterns, values, and institutions that are shared by citizens of the same nation.
- **International culture** is the term for cultural traditions that extend beyond and across national boundaries. Because culture is transmitted through learning rather than genetically, cultural traits can spread through borrowing or *diffusion from one group to another*:
  - Borrowing
  - Colonialism

**Writing the Social Text** Richard Brown,2017-07-05 During the past decade it has become commonplace to interpret social and cultural reality the very groundwork of the social sciences as linguistic constructions Not only is society viewed as a text but scientific texts themselves are seen as rhetorical constructions This collection of scholarly essays begins with an overview of this emerging field and covers the specific stylistic practices by which social scientists create objective or true representations of society The volume closes with a consideration of the more telling challenges to the rhetorics of the social sciences and how these might be encompassed or overcome
