Global Warming and Climate Change

Global warming and climate change are already creating extreme conditions that threaten the entirety of life on earth. Over industrialization, widespread deforestation, and overreliance on fossil fuels are but some of the human activities that have contributed to the buildup of greenhouse gases such as carbon dioxide, methane, and nitrous oxide in the earth's atmosphere. A sharp upsurge in greenhouse gases over past decades already has resulted in a steady rise in sea levels, growing acidification of the world's oceans, increased droughts and famines, and the intensification of extreme weather events. Climate scientists warn that the window of opportunity for reversing the negative effects of global warming and climate change is rapidly closing. Without concerted action by individuals, churches, communities, shareholders, businesses, governments, and international organizations, the negative effects will become irreversible.

Sustainable Policies and Practices

Sustainability is crucial to the development of ecologically sound policies and practices that seek to restore balance to the natural world and end the disruptive relationships between humanity and the rest of God's creation.

Sustainable policies and practices aim to meet present human needs while ensuring that future generations have the resources they need to thrive. Sustainable policies and practices prioritize the protection of all forms of life and natural ecosystems, while supporting human beings to live in healthy balance with the earth.

We urge United Methodists to adopt sustainable habits and practices, including refraining from overconsumption, repurposing and recycling materials, avoiding products that pollute or otherwise harm the environment, and reducing the carbon footprints of individuals and families by reducing overall reliance on fossil fuels for heat, transportation and other goods.

We Shall Not Be Moved Jane Ellen Nickell, 2014-10-15 As Protestant denominations are fracturing over whether to ordain gays and lesbians this work looks at The United Methodist Church s conversations about the issue in light of Methodism s historic contests over the leadership of African Americans and women to see what can be learned from these earlier periods of change Using the uniform context of the Methodist General Conference where denominational policy is set the book analyzes transcripts of floor debates in key years of these struggles letting those who argued for and against the changes speak for themselves Those arguments are read through the lens of French sociologist Pierre Bourdieu whose theory offers a sophisticated model that goes deeper than simple resistance to change in articulating a dialectic between social structures and agents that predisposes both to reproduce existing power relationships This interdisciplinary historical study seeks to move beyond conscious motivations for the exclusion of these three groups and uncover deeply embedded misrecognized social dynamics In exploring these groups stories this book examines who holds power in Methodist churches how changes in authority structures occur and why it is such a long and painful process
