argues that the defeat of the main French Centre Right party in the 2017 presidential and legislative elections and its subsequent disintegration were the result of a failure to respond effectively to the challenges posed by a continuing realignment of the party system. By the start of the Hollande presidency many sections of the electorate had lost faith in the traditional parties of government and the ideologies which they represented and were adopting a more individualist approach to politics. The Left Right divide which had determined relations between parties since the creation of the Fifth Republic in 1958 gave way to a new arrangement based on three axes: identity, liberal economics and Europe. These policy areas would provoke major differences of opinion among supporters of the Centre Right and lead a significant number of them to abandon Les Républicains which was a major factor in the election of Emmanuel Macron.

Territorial Cohesion

Eduardo Medeiros, 2018-12-14. This book offers a comprehensive overview of several urban related aspects that are of central importance to successful territorial cohesion processes. In essence it sheds new light on issues concerning urban polycentrism, functional urban regions, integrated sustainable urban development and the EU Urban Agenda and on how they can help to achieve territorial cohesion policy goals. As an elusive and fairly recent concept territorial cohesion has to date only been vaguely debated in the available literature which for the most part focuses on its historical origins and its relevance for EU policymaking. Instead this book synthesizes for the first time a range of perspectives that place urban elements and policies at the core of territorial cohesion analysis. As such and given the fact that territorial cohesion is a holistic concept the book will appeal to a broad readership from both the academic and policymaking arenas.

Being Young

in Super-Aging Japan Patrick Heinrich, Christian Galan, 2018-05-15. Japan is not only the oldest society in the world today but also the oldest society to have ever existed. This aging trend however presents many challenges to contemporary Japan as it permeates all areas of life from the economy and welfare to social cohesion and population decline. Nobody is more affected by these changes than the young generation. This book studies Japanese youth in the aging society in detail. It analyses formative events and cultural reactions. Themes include employment, parenthood, sexuality but also art, literature and language thus demonstrating how the younger generation can provide insights into the future of Japanese society more generally. This book argues that the prolonged crisis resulted in a commonly shared destabilization of thoughts and attitudes and that this has shaped a new generation that is unlike any other in post war Japan. Presenting an inter disciplinary approach to the study of the aging trend and what it implies for young Japanese this book will be useful to students and scholars of Japanese culture and society as well cultural anthropology and demography.
