Human Development and Global Institutions Richard Ponzio, Arunabha Ghosh, 2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case

studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies

Cooper, Claudia María Vargas, 2008 Sustainable Development in Crisis Conditions takes a broad based and integrative approach to exploring nation building and reconstruction in the wake of environmentally destructive warfare Freedom from Poverty as a Human Right Thomas Pogge, 2007 Collected here are fifteen essays about the severe poverty that today afflicts billions of human lives The essays seek to explain why freedom from poverty is a human right and what duties this right creates for the affluent This volume derives from a UNESCO philosophy program organized in response to the first of the Millennium Development Goals MDGs adopted by the United Nations General Assembly in 2000 to eradicate extreme poverty and hunger Publisher's description

Global Political Economy Robert O'Brien, Marc Williams, 2013-06-14 This text provides a broad ranging historical account of the emergence of a worldwide economy since the 15th century combined with a systematic analysis of the key frameworks of international political economy today **Facing Global Environmental Change** Hans Günter Brauch, Navnita Chadha Behera, Patricia Kameri-Mbote, John Grin, Úrsula Oswald Spring, Béchir Chourou, Czesław Mesjasz, Heinz Krummenacher, 2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth session Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world *Human Security, Law and the Prevention of Terrorism* Andrej Zwitter, 2010-11-23 This study examines two important questions regarding terrorism and political violence which threats to human security constitute root causes for collective violence and which adequate responses for these root causes are available to the international community The responses are examined on the basis of international law in particular human rights law and within the concept of human security with the goal of fostering a long term reduction in political violence Drawing on existing political discussions and research about the root causes of terrorism Zwitter develops a legal framework for the application of legal terrorism prevention tools This study serves as a framework of action and analysis using concepts and particularly legal frameworks

which are already broadly or universally recognized to increase the applicability of the framework without having to invent new legal regimes In doing so it makes use of the concept of human security for tackling breeding grounds and other facilitators of terrorism making it universally accessible Combining social science research with legal sociology and international law this book will be of interest to students and scholars of politics international relations security studies conflict studies and law

Ethics of Global Development David A. Crocker, 2008-07-10 Poverty inequality violence environmental degradation and tyranny continue to afflict the world *Ethics of Global Development* offers a moral reflection on the ends and means of local national and global efforts to overcome these five scourges After emphasizing the role of ethics in development studies policy making and practice David A Crocker analyzes and evaluates Amartya Sen s philosophy of development in relation to alternative ethical outlooks He argues that Sen s turn to robust ideals of human agency and democracy improves on both Sen s earlier emphasis on capabilities and functionings and Martha Nussbaum s version of the capability orientation This agency focused capability approach is then extended and strengthened by applying it to the challenges of consumerism and hunger the development responsibilities of affluent individuals and nations and the dilemmas of globalization Throughout the book the author argues for the importance of more inclusive and deliberative democratic institutions

Privatizing Water Karen Bakker, 2013-02-15 Water supply privatization was emblematic of the neoliberal turn in development policy in the 1990s Proponents argued that the private sector could provide better services at lower costs than governments opponents questioned the risks involved in delegating control over a life sustaining resource to for profit companies Private sector activity was most concentrated and contested in large cities in developing countries where the widespread lack of access to networked water supplies was characterized as a global crisis In Privatizing Water Karen Bakker focuses on three questions Why did privatization emerge as a preferred alternative for managing urban water supply Can privatization fulfill its proponents expectations particularly with respect to water supply to the urban poor And given the apparent shortcomings of both privatization and conventional approaches to government provision what are the alternatives In answering these questions Bakker engages with broader debates over the role of the private sector in development the role of urban communities in the provision of public services and the governance of public goods She introduces the concept of governance failure as a means of exploring the limitations facing both private companies and governments Critically examining a range of issues including the transnational struggle over the human right to water the commons as a water supply management strategy and the environmental dimensions of water privatization Privatizing Water is a balanced exploration of a critical issue that affects billions of people around the world
