The Amarna Letters Jacob Lauinger,Tyler Yoder,2025-02-28 During Egypt s Eighteenth Dynasty ca 1550 1292 BCE the New Kingdom pharaohs campaigned repeatedly in Syria and the Levant establishing political control over much of the region As a result of these conquests the rulers of Levantine city states sent letters written in Akkadian in the cuneiform script on clay tablets to the Egyptian pharaohs So too did the kings of the other great geopolitical powers of the time Assyria Babylonia Hatti and

Mittani maintain an active diplomatic correspondence with Egypt's pharaohs Beginning in the nineteenth century CE local farmers and later archaeologists working at Akhetaten modern Tell el Amarna the one time Egyptian capital discovered remnants of this correspondence mostly dating to the reigns of Amenhotep III ca 1388 1350 BCE and his son and successor Akhenaten ca 1350 1333 BCE with some dating to Tutankhamun ca 1333 1323 This is a period of increasing friction as the great powers sought to extend their borders The Amarna Letters thus illuminate a pivotal point in Egypt's foreign relations during the Late Bronze Age Even though they provide us with a narrow window of only about thirty years time 1358 1325 BCE they are an important witness to the general nature of Egypt's diplomatic relations during the Eighteenth and Nineteenth Dynasties This new digitally borne edition of the Amarna Letters offers the first complete collection of the letters with responsible transliterations that have been checked against available photographs and hand copies clear and consistent translations and an up to date and extensive bibliography As such it is and will remain an essential resource

Social Sciences Studies in Turkey Eyup Saritas,2018-05-14 OPEC members have been suffering from the dramatic decline in oil prices over the past two years which has seen crude dropping to between 40 and 50 per barrel from more than 100 in 2014 Since OPEC declared its noncutting policy on November 2014 both government budgets and economies of oil exporting countries felt tremendous pressure Saudi Arabias economy had especially been seriously affected because of the strategy against the USA Faced with these challenges OPEC members finally agreed in a September 2016 meeting in Algeria to cut production in principle Exact quotas were determined in late November After this meeting OPEC oil production began to decrease and the oil prices began to increase In this study we found that there is a relation between OPECs oil production and oil prices We observed the monthly data from November 2014 to May 2017 and we showed that the OPECs influence on oil prices are dwindling OPEC is still important on prices and the announcements have an effect on these prices however this impact is dwindling Recently on May 2017 OPEC and other oil producers are on course to agree to an extension of supply cuts by a further nine months According to Forbes crude oil prices had gone up by more than 9% in November following the initial agreement to reduce output as opposed to just a 2% jump in oil prices when OPEC announced the extension of the cut This not only indicates that the proposed output restrictions are not enough to have a meaningful impact on oil prices but also hints at the fact that OPECs power to influence crude oil prices is waning
