Harper,2024-11-12 If you re like most of us there s more than one aspect of your life that could use some unfucking More often than not the challenges of mental health physical health boundaries sex and relationships are tied together in a big overwhelming tangle And when it comes to sorting ourselves out it s hard to know where to begin But take heart this comprehensive resource from bestselling author Dr Faith G Harper makes that process a whole lot easier Combining the tools and insights from four of her most essential titles Unfuck Your Brain Unfuck Your Body Unfuck Your Intimacy and Unfuck Your Boundaries this omnibus empowers you to tackle all parts of your life on your way to becoming your best self If you re new to Dr Faith s work this is the perfect introduction to her accessible funny science based approach to getting your act together Failing Desire Karmen MacKendrick,2017-12-04 Luckily for human diversity we are perfectly capable of desiring impossible things Failing Desire explores a particular set of these impossibilities those connected to humiliation These include the failure of autonomy in submission of inward privacy in confession of visual modesty in exhibition and of dignity in playing various roles Historically those who find pleasure in these failures range from ancient Cynics through early Christian monks to those now drawn by queer or perverse eroticism As Judith Halberstam pointed out in *The Queer Art of Failure* failure can actually be a mode of resistance to demands for what a culture defines as success Karmen MacKendrick draws on this interest in queer refusals To value desire or seek humiliation undercuts any striving for success but it draws our attention particularly to the failures of knowledge as a form of power whether that knowledge is of one body or of a population How can we understand will that seeks not to govern itself psychology that constructs inwardness by telling all blushing shame that delights in exposure or dignity that refuses its lofty position Failing Desire suggests that the power of these desires and pleasures comes out of the very realization that this question can never quite be answered Trans and Sexuality Christina Richards,2017-08-10 Grounded in cutting edge qualitative research *Trans and Sexuality* explores the sexuality of people who do not identify with the gender that they were assigned at birth Arguing that whilst splitting members of the trans community into distinct groups might seem like a reasonable theoretical procedure the pervasive assumption that group membership impacts on the sexuality of trans people has unduly biased opinions in this highly contested yet dramatically under researched area Moreover whilst existing literature has taken a purely positivistic standpoint or relies on methodology that could be seen as exploitative towards trans people Richards is careful to place the real life experiences of trans research participants at the heart of the work Showing that sexuality extends beyond the bedroom this forward thinking book touches on topics such as identity sexuality and the intersections between the two Richards takes a cross disciplinary approach and considers the sexuality of trans people within the contexts

of psychiatric and psychological settings including Gender Identity Clinics as well as in the broader contexts of cultural and community settings The implications of the research at hand are also explored with respect to counselling psychology and existentialist philosophy Trans and Sexuality will appeal to academics researchers and postgraduate students in the fields of gender and sexuality counselling sociology psychotherapy psychology and psychiatry It will be of particular interest to those seeking an in depth and up to date overview of ethics and methodologies with people from marginalised sexualities and genders

What the Body Commands Colin Klein, 2015-08-14 A novel theory of pain according to which pains are imperatives commands issued by the body ordering you to protect the injured part In *What the Body Commands* Colin Klein proposes and defends a novel theory of pain Klein argues that pains are imperative they are sensations with a content and that content is a command to protect the injured part of the body He terms this view imperativism about pain and argues that imperativism can account for two puzzling features of pain its strong motivating power and its uninformative nature Klein

argues that the biological purpose of pain is homeostatic like hunger and thirst pain helps solve a challenge to bodily integrity It does so by motivating you to act in ways that help the body recover If you obey pain s command you get better in ordinary circumstances He develops his account to handle a variety of pain phenomena and applies it to solve a number of historically puzzling cases Klein s intent is to defend the imperativist view in a pure form without requiring pain to represent facts about the world Klein presents a model of imperative content showing that intrinsically motivating sensations are best understood as imperatives and argues that pain belongs to this class He considers the distinction between pain and suffering explains how pain motivates addresses variations among pains and offers an imperativist account of maladaptive pains pains that don t appear to hurt masochism and why pain feels bad Trans Bodies, Trans Selves Laura
