**Introducing Single Member Companies in Ethiopia. Major Theoretical and Legal Considerations** Jetu Edosa Chewaka, 2016-05 In an increasingly universalizing world operating business in the form of companies is apparently becoming an indispensable aspect of modern commercial life The major reason that led to the corporate form as the principal method of organization of commercial activity among other things is its advantage of limited liability Limited liability in its classical sense implies the insulation of individual shareholders composing the company from the liability of company debts Yet the traditional corporate legal theory has confined the advantage of limited liability within the purview of multimember corporations making it inaccessible to solo investors However quite recently the historical relic of corporate theory that views corporations as a legally personified body of numerous subscribers of shares has undergone a sharp evolution as have many other business practices and their legal bases The purpose of this thesis is to look into notable literature on major corporate theories and analyze whether it would be applicable to single member companies SMC It also seeks to compare major legal frameworks governing SMC s in comparative jurisdictions to show the legal and theoretical implications of introducing SMC s into the Ethiopian corporate legal system

Slingerland,Mark Collard,2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that

science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept     Environmental Conflict and Cooperation James Lee,2019-06-12 Environmental Conflict and Cooperation explores the evolution of environmental conflict as a field of research and the study of cooperation as an alternative to war Over four key parts James R Lee navigates the contours of this growing field and paints a vivid framework for better understanding issues around environmental conflict and security The premise of the field and its historic manifestations The definition and purpose of research The persuasions or types of environmental conflict and cooperation The promise of research in leading to better decision making and to broaching new challenges Over the course of these parts the author outlines the deep historic record of this discipline arguing that it will play a key role in understanding important future trends Utilizing a wide variety of case studies that range from ancient examples including conflict over the Cedars of Lebanon and the role of tin in the Peloponnesian Wars to future oriented scenarios including expanded island building in the South China Sea and the global politics of geo engineering Lee highlights key concepts metrics and policy contexts that will test current understandings He also examines a variety of research methods and provides examples of the ways in which such research can be used to inform policy improvements This book will draw specific interest from students and scholars of environmental conflict and cooperation as well as researchers of environmental politics and security studies     **Eurasian Business and Economics Perspectives** Mehmet Huseyin Bilgin,Hakan Danis,Ender Demir,Manuela Zipperling,2024-08-20 This is the 28th issue of the Springer s series Eurasian Studies in Business and Economics which is the official book series of the Eurasia Business and Economics Society EBES [www.ebesweb.org](http://www.ebesweb.org) This issue includes selected papers presented at the 41st EBES Conference Berlin that was held on October 12 14 2022 and jointly be organized with GLO The Global Labor Organization and in collaboration with the FOM University of Applied Sciences The conference was held both in hybrid with both in person and online paper presentation format
