You now created a new project. You might get all scared by Visual C#'s interface because it is very crowded and you don't know what most of the controls do. Let's take a look at the interface for a bit: the first thing that pop's into your eyes is the form right in the middle. It is an empty form and what you have to do is to take controls from the "Toolbox", the panel from the left, and put them on it.
