

Project Questions and Answers

Q. Should we allow user to update existing record if it is marked as deleted? It does not mention in the document if we should throw an exception in this case, but I also don't think it is a good idea to update deleted record

A. This would be a good question for a real life scenario. For our project purposes, let's assume users can update any video, even deleted one.

Q. If the user does not specify video format when creating/updating video record, should the video format default to "unknown" following the default value of Video Format Enum? What should be the format code of "Unknown" be in videos table?

A. Let's assume that Unknown is an invalid value and the code should throw an exception.

Q. In the database all the types of video format match the VideoFormat enum except the Blu-ray. In the database, blurays are formatted as code BLU but the VideoInfo object has a Format enum that has a name of "Blu-ray". Referencing the VideoInfo video object it puts the "Blu-ray" as the format in the database and there is no a mismatch of the video formatting (for blu-ray only).

Should I need to convert this to "BLU" before sending over to the database ?

A. Yes, you do need to convert video format value to "BLU" before sending to database. This is typical real life scenario and unfortunately many students overlook it.

Q. I have a question on SearchVideoLibrary method. Should we include deleted videos if not search criteria is provided?

A. The answer is negative, do not include deleted videos.

Q. For the "SearchVideoLibrary" method, should the search results be case-sensitive?

A. The search should be case-insensitive.

Q. Are you expecting any particular naming conventions for the ClassLibrary Project names, or can they be called anything as long as it is clear which one uses Entity Framework and which one uses ADO.NET?

A. Feel free to name the projects as you like.

Q. My current solution file contains several extra projects in it that I used for testing. Is it OK to leave those there, or should I remove them prior to submitting the solution - and only submit the 2 ClassLibrary-type projects and the VideoLibraryDataLayer project?

A. Yes, you can leave additional projects in and submit the whole package.

Q. My ADO.NET project current contains a hard-coded connection string (I was having issues using the Configuration File). Will this be an issue when you run your automated tests?

A. This connection string won't cause any issues for my test fixture. Still, I would definitely not recommend hard-coding connection strings.
