Management of hospital communication

J. Antônio Cirino, 2021-10-04. Communication is an essential topic to be discussed in the context of hospital management as it is the common thread connecting all actors within the complex system of healthcare. Indeed, health is dedicated to the care of people by people. In this sense, all care management and support processes are interconnected through verbal and non-verbal mediation conducted by people, via technology or not. By organizing communication management into three main steps: strategic, organizational and institutional, J. Antônio Cirino helps to formalize knowledge regarding best practices and communication solutions. He suggests tools and concepts helping to diagnose the different scenarios and resources available in any type of setting to improve the communication strategy. Management of Hospital Communication is a strong contribution to the important topic of communication. Mr. Cirino's book connects the fundamental knowledge of communication sciences to the practical application in the health sector for hospital management and should be a valuable read to organizational leaders from around the globe. Ronald Lavater, CEO, Chief Executive Officer, IHF International Hospital Federation.
