Transatlantic Reflections on the Practice-Based PhD in Fine Art Jessica Schwarzenbach, Paul Hackett, 2015-08-11 Once the US was the only country in the world to offer a doctorate for studio artists however the PhD in fine art disappeared after pressures established the MFA as the terminal degree for visual artists Subsequently the PhD in fine art emerged in the UK and is now offered by approximately 40 universities Today the doctorate is offered in most English speaking nations much of the EU and countries such as China and Brazil Using historical political and social frameworks this book investigates the evolution of the fine art doctorate in the UK what the concept of a PhD means to practicing artists from the US and why this degree disappeared in the US when it is so vigorously embraced in the UK and other countries Data collected through in depth interviews examine the perspectives of professional artists in the US who teach graduate level fine art These interviews disclose conflicting attitudes toward this advanced degree and reveal the possibilities and challenges of developing a potential doctorate in studio art in the US

Exemplars of Truth Keith Lehrer,2019-01-02 This monograph is both an intellectual summation as well as a philosophical advancement of key themes of the work of Keith Lehrer on several key topics including knowledge self trust autonomy and consciousness He here attempts to integrate these themes and develop an intellectual system that can constructively solve philosophical problems The system is indebted to the modern work of Sellars Quine and Chisholm as well as historically to Hume and Reid At the core of this system lies Lehrer s theory of knowledge which he previously called a coherence theory of knowledge but now calls a defensibility theory Lehrer argues that knowledge requires the capacity to justify or defend the target claim of knowledge in terms of a background system Defensibility is an internal capacity supplied by that system to meet objections to the claim This theory however leaves open the problem of experience noted by other philosophers i e how to explain the special role of experience in a background system even granted we are fallible in describing it Lehrer offers a solution to the problem of experience arguing that reflection on experience converts the experience itself into an exemplar something like a sample that becomes a vehicle or term of representation The exemplar represents itself and extends to represent the external world It exhibits something about evidence and truth concerning experience that as Wittgenstein noted cannot be fully described but can only be shown Exemplar representation is the missing link of a background system to truth about the world

Arts Education and Literacies Amy Petersen Jensen,Roni Jo Draper,2015-06-26 In a struggling global economy education is focused on core subjects such as language arts and mathematics and the development of technological and career readiness skills Arts education has not been a central focus of education reform movements in the United States and none of the current education standards frameworks deeply address the processes texts and literacies that are inherent to arts disciplines This lack of clarity poses a problem for state and district leaders who might be inclined to advocate for the arts in schools and classrooms across the country but cannot find adequate detail in their guiding frameworks This volume acknowledges the challenges that arts educators face and posits that authentic arts instruction and learning can benefit a young person s development both inside and outside of the classroom It presents ways that arts teachers and literacy specialists can work together to help others understand the potential that arts learning has to enhance students 21st century learning skills

The Materiality of the Archive Sue Breakell,Wendy Russell,2023-10-30 *The Materiality of the Archive* is the first volume to bring together a range of

methodological approaches to the materiality of archives as a framework for their engagement analysis and interpretation Focusing on the archives of creative practices the book reaches between and across existing bodies of knowledge in this field including material culture art history and literary studies unified by an interest in archives as material deposits and aggregations in both analogue and digital forms as well as the material encounter Connecting a breadth of disciplinary interests in the archive with expanding discourses in materiality contributors address the potential of a material engagement to animate archival content Analysing the systems processes and actions that constitute the shapes forms and structures in which individual archival objects accumulate and the underpinnings which may hold them in place as an archival body the book considers ways in which the inexorable move to the digital affects traditional theories of the physical archival object It also considers how stewardship practices such as description and metadata creation can accommodate these changes The Materiality of the Archive unifies theory and practice and brings together professional and academic perspectives The book is essential reading for academics researchers and postgraduate students working in the fields of archive studies museology art history and material culture

Visual Culture Richard Howells, Joaquim Negreiros, 2019-03-05 This is a book about how to read visual images from fine art to photography film television and new media It explores how meaning is communicated by the wide variety of texts that inhabit our increasingly visual world But rather than simply providing set meanings to individual images Visual Culture teaches readers how to interpret visual texts with their own eyes While the first part of the book takes readers

through differing theoretical approaches to visual analysis the second part shifts to a medium based analysis connected by an underlying theme about the complex relationship between visual culture and reality Howells and Negreiros draw together seemingly diverse methodologies while ultimately arguing for a polysemic approach to visual analysis The third edition of this popular book contains over fifty illustrations for the first time in colour Included in the revised text is a new section on images of power fear and seduction a new segment on video games as well as fresh material on taste and judgement This timely edition also offers a glossary and suggestions for further reading Written in a clear lively and engaging style Visual Culture continues to be an ideal introduction for students taking courses in visual culture and communications in a range of disciplines including media and cultural studies sociology and art and design Geography, Art, Research Harriet Hawkins, 2020-09-27 This book explores the intersection of geographical knowledge and artistic research in terms of both creative methods and practice based research In doing so it brings together geography s creative turn with the art world s research turn Based on a decade and a half of ethnographic stories of working at the intersection of creative arts practices and geographical research this book offers a much needed critical account of these forms of knowledge production Adopting a geohumanities approach to investigating how these forms of knowledge are produced consumed and circulated it queries what imaginaries and practices of the key sites of knowledge making including the field the artist s studio the PhD thesis and the exhibition emerge and how these might challenge existing understandings of these locations Inspired by the geographies of science and knowledge art history and theory and accounts of working within and beyond disciplines this book seeks to understand the geographies of research at the intersection of geography and creative arts practices how these geographies challenge existing understandings of these disciplines and practices and what they might contribute to our wider discussions of working beyond disciplines including through artistic research This book offers a timely contribution to the emerging fields of artistic research and geohumanities and will appeal to undergraduate and postgraduate students and researchers
